Course Overview:

This course focuses on the institution of the U.S. presidency, with a focus on the development of the office over time, executive power, and the president's relationship with other key actors. In the first class, we will explore the origins of the office itself and how it has evolved into the “modern presidency.” We will then move quickly into campaigning, the nomination process, and elections. Thereafter we will spend time focusing on presidential power and after briefly considering the role of the vice presidency, we will examine the executive’s relationship with the American people, Congress, and the courts. In the last week of the class, we will critically examine the thesis of the “Two Presidencies” and look at the power of the president in controlling the foreign policy of the United States.

Required Reading:

“Readings” will consist of a mixture of books, political science articles, judicial opinions, blog posts, short videos, etc.
