

1 Course Objectives

This course examines the macroeconomy in an international setting. The course covers the exchange rate and the current account, and relates their determination to world capital markets and the domestic macroeconomy. The course discusses economic policies and their effects under different exchange rate regimes—ranging from floating rates to fixed rates to monetary unions—and presents implications for the current account and the economy as a whole. A final part of the course turns to recent issues including global financial crises and the present U.S. current account imbalance.

2 Prerequisites

Economics 110A-B.

3 Readings

Lecture notes become available online at econ.ucsd.edu/muendler/teach/05s/103 before each class.

The readings (articles) help you review the lecture material beyond the textbook. They are available through the class web page (see link above). Web links to copyrighted readings only work from on-campus domains.

4 Problem Sets

There will be three problem sets, due on scheduled dates throughout the quarter. You are encouraged to work on the problems with your classmates. The first problem set will have eight questions, the latter two will have six questions each. Correct answers count for four points per question.

Your teaching assistants Shalini Jhatakia and Christopher Nekarda will hold sections over the course of the quarter to help you approach the problems. Your solutions to the problem sets will be graded and your performance on them will be part of the final grade. Problem sets have to be handed in before 12:30pm on the due date. You may bring them to class before it starts.

5 Assessment

There will be two midterm exams and a final exam. The two midterm exams will take 80 minutes each and the final exam will take 120 minutes. All exams are cumulative.

Your final raw score will be your total points from the three exams and the three problem sets:

<table>
<thead>
<tr>
<th></th>
<th>Points</th>
<th>Dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Problem sets:</td>
<td>80 points (32+24+24 points)</td>
<td>4/19, 5/10, 6/2</td>
</tr>
<tr>
<td>Midterm 1 (80 minutes):</td>
<td>80 points</td>
<td>4/26</td>
</tr>
<tr>
<td>Midterm 2 (80 minutes):</td>
<td>80 points</td>
<td>5/17</td>
</tr>
<tr>
<td>Final (120 minutes):</td>
<td>120 points</td>
<td>6/7</td>
</tr>
<tr>
<td>Total:</td>
<td>360 points</td>
<td></td>
</tr>
</tbody>
</table>

Midterm exams last for the time of a lecture. (Problem sets have to be handed in before 12:30pm on the due date.) The final exam lasts 120 minutes.

Your final letter grade will be inferred from the typical grade distribution (curve) in economics classes at UCSD. You can find this grade distribution at econ.ucsd.edu/muendler/teach/05s/103. So, the difficulty or simplicity of problem sets and exams will not matter, whereas your relative performance in comparison to your classmates will determine your final letter grade.

We will offer review sessions to prepare you for the exams.
