

BILD4 Spring Quarter 2019

Instructor: Swarna Mohan, Ph.D.

Email: swmohan@ucsd.edu

Office hours: Mondays 2 – 3pm HSS 1145L or by appointment (24 hours' notice required for appointments)

Lecture: Mondays 5:00 – 6:20pm, Center Hall 119

Lab:

Section	Day	Time	Location	IA	IA email
B01	Tuesday	9 – 11:50am	TATA 2301	Payal Ramchandani Amy Lee	pramchan@ucsd.edu aml107@ucsd.edu
B02	Tuesday	9 – 11:50am	TATA 2302	Laura Cui Amy Lee	ljcui@ucsd.edu aml107@ucsd.edu
B03	Tuesday	9 – 11:50am	TATA 2303	Jonathan Hanna Shreyana Bolleddu	johanna@ucsd.edu shbolled@ucsd.edu
B04	Tuesday	9 – 11:50am	TATA 2304	Jacob Jeziorski Shreyana Bolleddu	jjeziors@ucsd.edu shbolled@ucsd.edu
B05	Thursday	9 – 11:50am	TATA 2301	Payal Ramchandani Amy Lee	pramchan@ucsd.edu aml107@ucsd.edu
B06	Thursday	9 – 11:50am	TATA 2302	Laura Cui Amy Lee	ljcui@ucsd.edu aml107@ucsd.edu
B07	Thursday	9 – 11:50am	TATA 2303	Jonathan Hanna Shreyana Bolleddu	johanna@ucsd.edu shbolled@ucsd.edu
B08	Thursday	9 – 11:50am	TATA 2304	Jacob Jeziorski Shreyana Bolleddu	jjeziors@ucsd.edu shbolled@ucsd.edu

Course introduction:

Welcome to Introductory Biology Laboratory! BILD 4 aims to develop an understanding for research in the biological sciences through discovery-based laboratory experiments. We will work in teams to collect, analyze, and present original research data while learning foundational biological concepts and laboratory skills. Data collected in this course will contribute to an on-going research project on soil microbiomes at the Scripps Coastal Reserve on campus.

Learning goals:

- Collaborate with one another to learn foundation biological concepts and laboratory skills
- Apply knowledge of molecular biology concepts and molecular techniques to plan experiments, explain and troubleshoot results.
- Demonstrate proficiency at the basic molecular biology techniques used in the lab.
- Explain the importance of proper controls in designing experiments and interpreting results.
- Perform basic lab math skills, statistical analysis, and graphing.

- Draw conclusions based on evidence and reasoning.
- Use basic bioinformatics databases and applications.
- Find, read, and evaluate primary literature.
- Collaborate with one another to learn foundation biological concepts and laboratory skills.

Tentative Course schedule:

Week	Lecture topic Mon. 5 – 6:20pm	Lab topic Tues. or Thurs 9am – 12pm	Lab manual sections	Assignments
1	Introduction to BILD 4 Microbiomes Statistics	Introduction to laboratory Pipetting and statistics Error analysis	BB1 BB2	
2	Forms of biodiversity Introduction to Ecoplate Carbon source utilization	Soil properties Ecoplate setup	SP1 SP2 FB1 GB1	WA#1 Due in lab
3	Quiz 1 (Wk1 – 2 lab and lecture) Ecoplate analysis Biodiversity calculations	Scripps Coastal Reserve field trip Moisture Analysis Ecoplate analysis and biodiversity calculations	FW SP3 FB2 FB3	
4	DNA purification 16S rDNA sequences	Genomic DNA prep Polymerase chain reaction	GB2 GB3	WA#2 Due in lab
5	Polymerase chain reaction Gel electrophoresis	Gel electrophoresis PCR Purification	GB4 GB5	Poster part 1 (end of lab)
6	Recombinant DNA techniques Biotechnology	Ligation Transformation	GB6 GB7	WA#3 Due in lab Poster part 2 (end of lab)
7	Quiz 2 (Wk 3 – 6 lab and lecture) DNA sequencing	Transformation data analysis	GB8	Poster part 3 (end of lab)
8	Sequencing analysis and Biodiversity calculations review	DNA sequence analysis Biodiversity calculations	GB9 GB10	
9	No lecture – Memorial day	Continue work on posters		Poster part 4
10	Quiz 3 – 5 – cumulative quiz	Work on last writing assignment		Posters Due Sun. 6/2 by 11:59pm WA#4 Due at the end of lab
6/13/19	Poster presentations Thursday 7 – 10pm			

Components of the course:

- Lecture: Learn biological concepts related to the laboratory research project
- Laboratory: Engage in a collaborative research project on soil microbiomes on campus
- Project: Analyze real data and present that data via an individually written report and a group constructed poster.

Learning in this course:

BILD 4 is designed to be a collaborative environment for everyone to learn together and construct a shared understanding of the material. Active participation and contribution in classes and in the laboratory are essential because many ideas and laboratory methods that will be developed in these activities cannot be easily captured otherwise. Being able to communicate understanding, articulate confusion, and defend scientific arguments based on evidence and reasoning is both useful for learning and critical to success in any discipline. To encourage collaboration and community building, many class and laboratory activities and assignments will be done in teams, and grades will not be assigned on a curve.

Instead of memorization, we will focus on developing an understanding of fundamental concepts and laboratory skills as they apply to different examples and learn to draw conclusions based on evidence and reasoning. We will utilize class and laboratory time to construct and apply our knowledge, troubleshoot challenging topics, practice problem solving, and develop skills in critical thinking. Laboratory reports and the research proposal will challenge us to think critically about data and experiments.

Smith et al (2009) Science 323: 122-124. <http://science.sciencemag.org/content/323/5910/122.short>

Course Logistics:

The core learning components in this course are comprised of collaborative activities in class meetings and laboratory sections, in addition to independent and group work on studying and completing assignments. Course materials, announcements, and other important details will be available on the TritonEd (<https://triton.ed.ucsd.edu>). Please check the course website and your @ucsd email regularly for updates and relevant information

Course materials:

Laboratory activities are detailed in the BILD 4 Laboratory Manual, available at the bookstore. Each student will need to purchase a copy of the BILD 4 Laboratory Manual with carbonless sheets. For the laboratory, knee-length laboratory coat and UV-blocking safety glasses or goggles are required, and they are also available at the bookstore. **iClicker is required for lectures and should be registered on TritonEd.**

Participation and contribution in lectures will be mainly through clicker questions and short writing activities. To participate in clicker-based discussions, please have an iClicker registered on TritonEd. Short in-class writing activities will be done in the carbonless personal lab manuals, so please be sure to bring the Laboratory Manual to class meetings and laboratory sections.

Lectures:

Lectures will be recorded and made available online as a resource for learning (<http://podcast.ucsd.edu/>).

However, participation and contribution are highly encouraged, as substantial portions of class meetings will be interactive. Many important concepts and ideas that are the result of collaborative learning cannot be easily captured on video. Therefore, podcasts are provided for the purpose of review and should not be used solely to substitute for active engagement in class meetings.

Laboratory Attendance:

Attendance, active participation and contribution in all laboratory sessions are required. Being late or missing laboratory sessions without a valid excuse is unprofessional and will result in deductions from the course grade. We understand that emergencies do happen **and in case of emergencies, please contact Dr. Mohan as soon as possible**. Excused absences due to medical reasons require documentation from a physician.

Being more than 10 minutes late without a legitimate excuse will result in the following grade deductions:

- First time: 1% deduction of professionalism grade
- Second time: 5% deduction of professionalism grade (i.e. loss off all professionalism points)
- Third time or subsequent times: deduction of an additional 5% of the course grade for each time

Being more than 30 minutes late will count as a missed laboratory session. Missing a laboratory session without a legitimate documented excuse (illness or family emergency) will result in deduction of 10% of course grade for the first laboratory session missed. **Missing more than one laboratory session will require the student to drop the course.**

Technology:

Students are welcome to bring laptop computers, tablets, or similar technology to class meetings and discussion sections for note-taking purposes. Please see this research study, which shows that multi-tasking on computers in class is likely to decrease not only your own grade but also the grades of people around you who can see your screen! For this reason, we ask that you do not flip between relevant course materials and irrelevant activities on the internet. The use of cell phones, computers, or other personal devices is not permitted in the laboratory for safety reasons.

Sana et al (2013) Computers and Education 62: 24-31

<http://www.sciencedirect.com/science/article/pii/S0360131512002254>

Grading:

BILD 4 has five grading components: contribution (20%), writing assignments (25%) quizzes (30%) poster presentation (20%), and professionalism (5%). Final grades will be determined based on percentages out of 100%. There are no opportunities for extra credit beyond what is assigned as part of the course.

The general grading scheme is as follows, although it may be adjusted to improve everyone's grades if necessary. **BILD 4 is not graded on a curve, i.e. 20% of students getting A, B, C, and such. Thus, the ability to do well in this course is not dependent on others doing poorly.**

A+	97-100%	B+	87-89%	C+	77-79%	D+	67-69%	F	0-59%
----	---------	----	--------	----	--------	----	--------	---	-------

A	93-96%	B	83-86%	C	73-78%	D	63-66%		
A-	90-92%	B-	80-82%	C-	70-72%	D-	60-62%		

Contribution: Active participation both in classes and laboratory sections is essential to learning in this course. There will be many contribution items, including pre-laboratory assignments, in-class and in-laboratory discussions and activities, laboratory notebooks and data collection. Contributions will be graded for thoughtful completion. Because individual students may have different competing schedules and life events, **completing 85% of the contribution items will earn the full contribution grade.**

Contributing to the class community is greatly valued in this course. If 90% or more of all students complete CAPEs, instructional assistant evaluations, and other course-based evaluation surveys in a mature and professional fashion, i.e. taking them seriously and providing timely and constructive feedback, every student in the course will be awarded 2 additional contribution points.

Writing assignments: There will be 4 writing assignments throughout the quarter. The assignments will focus on generating figures from data collected by all groups in each laboratory section and drawing conclusions that are supported by evidence and reasoning in scientific arguments. Two of the writing assignments will be done individually and two will be done as a group. Please see TritonEd throughout the quarter for more details on these assignments.

Quizzes: There will be 2 short quizzes given during lecture in weeks 3 and 7 and a longer cumulative quiz (equivalent to three short quizzes) given during week 10. Quizzes will be open resource (you can use written notes and calculators **but not electronic equipment that can be used to communicate with others**). To facilitate reflection and learning from quizzes, each quiz will be in two phases: The first phase will be done individually and the second phase will be the same quiz done again in groups. The individual portion will count for 80% of the quiz grade, and the group portion will count for 20%.

Poster project: The project will be a research proposal written and presented in poster format collaboratively in teams. Each team will identify a topic to study hypothetically and then propose experiments to investigate that topic using foundational concepts and laboratory skills learned in the course. An individual component will involve summaries and critical assessments of other posters. Please see TritonEd throughout the quarter for more details.

Professionalism: This portion of the course grade is intended to engage students in considering the impact of their actions on their own learning and the learning of others in the course. Unprofessional interactions consume time yet have no meaningful benefits to you, your fellow students, and/or the instructional team. Analogously in the workplace, being unprofessional to your colleagues or supervisors will only discount you. When you are discounted, you may not be invited for new opportunities that you may or may not be aware of.

Professionalism can be demonstrated through individual and community efforts. The individual component is to account for demonstrating maturity and professionalism. By default, every student is assumed to be professionally mature. Hence, this component is awarded to every student at the beginning of the quarter. During the quarter, based on observations by the teaching team, which includes but is not limited to one-on-one interactions, electronic communications, promptness and active participation in lab, your professionalism credit may be deducted in steps of 0.5 or 1%.

Example interactions with meaningful benefits that result in the following are desired:

- Deeper insight into course material, course concepts, biology, and/or society in general
- Improvement in skill building and future opportunities
- Learning conceptually and meaningfully why full credit was not awarded for an assignment
- Reporting errors or problems in class or laboratory, assignments, or other course material

Example interactions that have no meaningful benefits that should be avoided:

- Asking questions when the information is already available or will eventually be known
- Ignoring the directions or requests from the instructional team
- Harassing and/or bullying the instructional team or other students, either in person or online
- Being late to lab, or missing class without an acceptable excuse
- Contributing inequitably to group work in lab

Additional enrollment and waitlist policies are available online (<https://biology.ucsd.edu/education/undergrad/course/waitlist.html>).

Late or missing assignments:

No late contribution items will be accepted, as completing 85% of all the contribution items will earn the full contribution grade. **No late assignments will be accepted for the writing assignments or the poster project, except in the case of a documented short-term illness or serious family emergency.** In this case, please contact Dr. Mohan as soon as possible or as soon as it is reasonable to do so.

Regrades:

It is your responsibility to check your essays/quizzes for clerical errors in grading. If a grading error has been made, you should **submit a regrade request to Dr. Mohan at the end of a lecture within one week of return of the assessment.** If the quizzes or assignments are modified in anyway after they've been returned to you, then they cannot be submitted for a regrade. Simply write "please re-grade Q #" or "arithmetic error on p. #" on the cover of your paper. Write a concise description of the alleged error **on a separate, attached piece of paper.** No re-grades are possible for quizzes written in pencil or non-permanent ink. Students who submit quizzes for re-grading understand that we may (1) re-grade the entire exam, and (2) compare the submitted paper to a scanned copy of the original exam.

Group work:

A major goal of the course is to learn to collaborate with others. Unfortunately, despite best efforts and intentions, groups do not always function optimally. Dealing with these challenges is a natural part of the learning experience. Everyone is expected to contribute fully and equitably to group work as part of the university learning community.

If significant disputes occur over the relative contribution of individual members of the group, students can submit an appeal. In such cases, the group grade will be multiplied by the number of people in the group, and the points can be divided among individuals based on what each group member thinks they deserve based on their effort. To submit an appeal, all members of the group need to get together and provide the following information in a document: clear and detailed descriptions of each member's contribution, calculations for how the points should be divided among the members, and signatures from each member with a statement attesting to the fact that everyone in the group has agreed to all information in the appeal

document. Please submit the appeal to Dr. Mohan at the end of a class meeting within one week of the assignment being returned.

Laboratory safety:

Safety precautions are crucial in the laboratory setting. **Biology lab safety training and assessment (<https://biology.ucsd.edu/education/undergrad/course/ug-labs.html>) must be completed by the beginning of the first laboratory meeting.** Students will not be allowed to participate in any laboratory section without completing this online training and assessment.

From the beginning of the first lab, appropriate laboratory attire is always required. Appropriate laboratory attire includes long pants or equivalent, long socks or equivalent, and closed-toe and closed-heel shoes. No skin should be exposed from the waist down at all times. Starting at the beginning of the second lab, personal protective equipment (PPE) is required. PPE includes laboratory coats that cover to the knees and UV-blocking safety glasses or goggles, both of which are available at the bookstore.

Library guide:

<http://ucsd.libguides.com/bild4>

A specific library guide has been designed for BILD 4. This website serves as the starting point for navigating campus library resources that support our needs in completing major assignments, such as the research proposal. Please feel free to schedule a consultation with Bethany Harris (bethany@ucsd.edu), our biomedical librarian, for further assistance.

Academic integrity:

<https://students.ucsd.edu/academics/academic-integrity/index.html>

Integrity of scholarship is essential for an academic learning community. In this course and at the university, we expect that both students and the instructional team will honor this principle and in so doing protect the validity of university intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. Instructors, for their part, will exercise care in planning and collaborating with students on academic work, so that academic integrity is upheld.

When people collaborate to work toward a common goal, shared values must be established so that everyone understands the acceptable ways for working together. In organizations, these are commonly called codes of conduct or ethics. In this course, we are using a statement of values in support of codes of ethics, like the Policy on Integrity of Scholarship, to state explicitly our values and describe the behaviors for maintaining and protecting those values.

All course materials are the property of the instructor, the course, and University of California, San Diego and may not be posted online, submitted to private or public repositories, or distributed to unauthorized people outside of the course. Any suspected instances of a breach of academic integrity will be reported to the Academic Integrity Office for review.

Discrimination and harassment:

The Office for the Prevention of Harassment & Discrimination (OPHD) provides assistance to students, faculty, and staff regarding reports of bias, harassment, and discrimination. OPHD is the UC San Diego Title IX office. Title IX of the Education Amendments of 1972 is the federal law that prohibits sex discrimination in educational institutions that are recipients of federal funds. Students have the right to an educational environment that is free from harassment and discrimination.

Students have options for reporting incidents of sexual violence and sexual harassment. Sexual violence includes sexual assault, dating violence, domestic violence, and stalking. Information about reporting options may be obtained at OPHD at 858-534-8298, ophd@ucsd.edu, or <http://ophd.ucsd.edu>. Students may receive confidential assistance at CARE at the Sexual Assault Resource Center at 858-534-5793, sarc@ucsd.edu, or <http://care.ucsd.edu>, or Counseling and Psychological Services (CAPS) at 858-534-3755 or <http://caps.ucsd.edu>.

Students may feel more comfortable discussing their particular concern with a trusted employee. This may be a student affairs staff member, a faculty member, a department chair, or other university official. These individuals have an obligation to report incidents of sexual violence and sexual harassment to OPHD. This does not necessarily mean that a formal complaint will be filed.

If you find yourself in an uncomfortable situation, ask for help. The university is committed to upholding policies regarding nondiscrimination, sexual violence, and sexual harassment.
