SCHEDULE FOR LECTURES & EXAMS AND READING MATERIAL

**IMMUNOLOGY BICD140
SPRING 2020**

DUE TO THE CURRENT COVID-19 OUTBREAK, ALL COURSE ACTIVITIES WILL BE CONDUCTED REMOTELY. THIS SYLLABUS IS SUBJECT TO CHANGE, PARTICULARLY BECAUSE OF CAMPUS EFFORTS TO CONTAIN COVID-19. ANY SCHEDULE CHANGES WILL BE POSTED ON THE COURSE WEBSITE. MAKE SURE TO FREQUENTLY CHECK THE WEBSITE TO KEEP UPDATED.

COURSE WEBSITE:

<https://canvas.ucsd.edu/courses/12457>

Also check out this website for resources on how to learn remotely:
<https://digitalllearning.ucsd.edu/learners/learning-remote.html>

LECTURES: Tuesdays and Thursdays 3:30p-4:50p through Zoom. Lectures will provide much information not contained in the reading, please attend to virtual lecture!

Note: All lectures (as well as discussion sections, Q&A and IA's review sessions) will be recorded and made available asynchronously.

OFFICE HOURS WITH DR LU: Thursday from 2:15-3:15pm via Zoom, except for the first week of class and when there has been an exam that week (instead there will be a Q&A section). I would be happy to talk with you about the class, Immunology in general, science and your studies. I am a wasted resource if you do not take advantage of my office hours!

Q&A SECTION:

	Day & Time	Location
Midterm1	Monday, 4/20 (11a-12p)	Via Zoom
Midterm2	Wednesday, 5/13 (11a-12p)	Via Zoom
Final	Friday, 6/5 (11a-12p)	Via Zoom

TEXT BOOK: The Immune System, Garland publishing, Third or newer Edition by Parham. The textbook is NOT mandatory; there will be reading in it associated

IMMUNOLOGY BICD140 SPRING 2020

with every lecture. The lectures will make extensive use of the figures in the text, as well as other material.

PREREQUISITES: BICD100 (Genetics) and BIMM100 (Molecular Biology), and their prerequisites. If a prerequisite has been waived to allow you to take this class, it is your personal responsibility to make up any deficiencies that you may have.

INSTRUCTIONAL ASSISTANTS:

Katelynn Kazane

kkazane@ucsd.edu

Quynh Nguyen

q9nguyen@ucsd.edu

Filipe Araujo-Hoffmann

faraujoh@ucsd.edu

Bryeson Rowell

bfrowell@ucsd.edu

OFFICE HOURS:

	Time	Location
Katelynn	Monday, 12-1p	Via Zoom
Quynh	Thursday, 2-3p	Via Zoom
Filipe	Tuesday, 12-1p	Via Zoom
Bryeson	Friday, 2-3p	Via Zoom

DISCUSSION SECTIONS: (SPECIFIC IAS WILL BE ANNOUNCED IN WEBSITE AND FIRST WEEK OF LECTURE)

SECTION		DAY & TIME	LOCATION	IA
A01	M	8:00-8:50a	Via Zoom	Quynh
A02	M	1:00-1:50p	Via Zoom	Filipe
A03	M	4:00-4:50p	Via Zoom	Quynh
A04	W	7:00-7:50p	Via Zoom	Katelynn
A05	W	8:00-8:50p	Via Zoom	Katelynn
A06	F	1:00-1:50p	Via Zoom	Bryeson

**IMMUNOLOGY BICD140
SPRING 2020**

Discussion sections are a valuable part of this course, and although discussion sections are not mandatory, I highly recommend that you take part in them. These sections serve to clarify, emphasize and expand points that have been introduced in lecture. The answers to problem sets will be available during discussion, **but will not be posted**, so “online” attendance will be highly valuable in preparation for exams. The section leaders craft each meeting to include opportunities for problem-solving, discussion, and expansion on particularly timely topics.

There are three discussion sections touching Special Topics, which are scheduled as follows:

Week April 6th -April 10th : Flow Cytometry

Week May 4th -May 8th : Transgenic mice

Week May 25th -May 29st : Antibodies: measurement, characterization and applications.

PDF files for the aforementioned discussion sections are in the website under “Downloads”

There will be no sections or office hours the first week of class. Sections will begin the second week of class.

PROBLEM SETS: Three Problem Sets will be assigned through the website. Problem sets will not be graded, but the material covered will be central to the exams and a very valuable study guide. Written answers will be provided in the discussion sections.

REVIEW SESSIONS:

The IAs will hold 2 hour review sessions before each midterm and the final on the Saturdays before the Exams. Final times to be announced in class and on the website.

	Day/Time	Location	IAs
Mid 1	TBD	Via Zoom	Felipe & Quynh
Mid 2	TBD	Via Zoom	Bryeson & Katelynn
Final	TBD	Via Zoom	All IAs

IMMUNOLOGY BICD140 SPRING 2020

*The times reflect the time the room is reserved. Most likely, the review will actually be held for the first two hours of the reservation, with the extra time in case the review runs longer.

EXAMS (VIA ZOOM): Your performance in the course will be evaluated by 2 midterm exams (25% each) and the final exam (50%). There are no scheduled make-up exams. Failure to take the exam will result in a zero. Extraordinary circumstances preventing you from taking an exam must be discussed in advance with the Student Affairs Office and Dr. Lu. If exceptions are made for these special circumstances, the make-up will be an ORAL exam given by Dr. Lu. Exams will consist of fill in the blank (with the answer bank) and multiple choice questions. An ID card (student ID or driver's license) will be required at every exam.

Midterms: Exam 1, covering all material covered and reading material assigned for lectures 1-6. Exam 2, covering all material covered and reading material assigned for lectures 8-13.

Final: Covering all lecture and reading material assigned the entire class with emphasis on material and reading assigned for lectures 15-20.

Extra credit: To enrich your learning experience, I would like to encourage you to attend a research seminar (via Zoom) on an important topic in Immunology (see below). You can earn up to 5% extra-credit to your final grade if you attend the selected seminars (1% for attending one seminar, 2% for two seminars and 5% for attending at least three seminars). Please submit a one-paragraph summary of what you have learned from the seminar to your section IA as a proof of the attendance. Making the connection between what you heard from the seminar and what you learned from the class is the key to get full extra credits. The selected seminars will be announced later on the Canvas class website or during the lectures).

GRADING: The grading is normalized to the higher score (top 5%). 60-70% of that score will be a D, 70-80% will be a C, 80-90% will be a B, and 90-100% of that will be an A. If everyone did well, then it would be possible for the entire class to receive A's or at least a high B; however, given the challenging nature of Immunology, this is unlikely. You are not competing with your fellow students. There is no shortage of high grades for those who do well. It is my hope that everyone will study hard enough to demonstrate sufficient knowledge of Immunology to earn an A or B. However, do not rely on your peers doing poorly...it is you against the material. If you have a concern about your grade or your performance on an exam, you must address this with me within one week of

IMMUNOLOGY BICD140 SPRING 2020

the exam, no exceptions. Do work that you can be proud of and stand by your performance.

REGRADE POLICY:

1. Send an email specifying which specific problem should be looked at and fully describe why you think the problem was wrongly graded.
2. Include BICD140 regrade request in your email subject.
3. The regrade request must be emailed within 1 week after the exams are graded.

EMAIL COMMUNICATION (TO DR. LU AND IAS): Please remember to include your first and last name in the body of the email and WRITE BICD140 IN E-MAIL SUBJECT (your e-mail will not be read if you do not write that). I will not respond to any questions regarding the content of the exams by email or answer lengthy questions on course material or anything else that can be done in person before/after class or during office hours. I will address questions about the course material during office hours. Please come talk to me in person.

LECTURE NOTES: The lecture slides will be posted on the website the day before the lecture. It is your responsibility to keep track of last minutes changes in the slides. Students are required to have access to the internet in order to obtain class information (syllabus, IA sections) and materials (problem sets). Information available on the website will not be handed out in class.

GOALS OF THE COURSE:

Immunology is the study of the physiological mechanisms that organisms use to defend their bodies from invasion by other organisms. The origins of the subject lie in the practice of medicine and in historical observations that people who survived the ravages of epidemic disease were untouched when faced with the same disease again—they had become immune to infection. Infectious diseases are caused by microorganisms, which have the advantage of reproducing and evolving much more rapidly than do their human hosts. During the course of an infection, the microorganism can pit enormous populations of its species against an individual. In response, the human body invests heavily in cells dedicated to defense, which collectively form the immune system. Parham 3rd Edition.

IMMUNOLOGY BICD140 SPRING 2020

During this quarter, we will explore the complex biology of the many cell types that defend the human body from infectious agents with the final goal of understanding how the immune system unites molecular, cellular, evolutionary and genetic principles to fight the war against pathogens.

ACHIEVING THE COURSE GOALS:

Learning Immunology: Immunology is not a linear discipline. You have to bring together several concepts simultaneously in order to understand each aspect of immunity. As you read and review, you will find that you have to look up terms and definitions, and it is an interactive process. You learn subjects 1, 2, and 3, and then you can go back and understand subject 1 with more clarity. **You cannot learn immunology in one pass and you cannot learn it quickly before the exam.** Start studying from the first week, and do not fall behind.

Lecture: Lectures are held twice a week and cover the major concepts indicated on the schedule. Please note that the indicated schedule and readings may be modified somewhat during the quarter, and any changes will be announced in lecture. While lecture slides will be posted on the class website before the class, these notes are **not** intended to replace lecture, and there will be material presented in class that does not appear in the lecture slides. You will be responsible for information provided in lecture in addition to the material assigned in the text.

Reading: Reading assignments are noted on the schedule. Any additional reading will be announced in lecture and on the web site. **You are strongly encouraged to read text material *before* lectures.** You will note that at the end of each chapter, problems and lists of key concepts are given. You are encouraged to try solving these problems and make use of supplementary material before lecture.

Problem Solving: In addition to problems given at the end of the chapter, three problem sets will be assigned. They will be posted on the website under "Files" and announced in class. You are encouraged to work these problems before section and to be prepared to discuss the answers during section. The answers will be provided and discussed during discussion sections.

**IMMUNOLOGY BICD140
SPRING 2020**

The Learning Environment: Participation in class (e.g. questions or responses to questions by the instructor) is strongly encouraged and contributes to a rich, interactive learning environment. Please refrain from eating, reading newspapers, scanning the web, and engaging in conversations during lectures and sections. Cell phones and messaging devices should be turned off. If you must leave class early, please sit in the back in an aisle seat so that you do not disturb others. Following these guidelines will help you, your colleagues, and instructors to stay focused on the material.

POLICY FOR POTENTIAL REFERENCE LETTER REQUEST: Having a letter does not always help you. In fact having a lukewarm letter will hurt you more than you think. A good letter needs real examples not just good words!

1. You need to be top 10% in the class.
2. You need to catch my attention either during or outside the class and office hours.
3. You need to catch IA's attention during the discussion sections or review sessions.

Academic integrity: Work on exams must be solely your own. Cheating will not be tolerated and will result in an F in the course, as well as any additional disciplinary actions as indicated by the policy to maintain academic honesty. Please note, letting someone cheat off of your exam is cheating!!

Please review UCSD's Policy on Academic Integrity:

<http://www-senate.ucsd.edu/manual/appendices/app2.htm#AP14>

On each of your midterms I will ask you to sign an honor code stating:

I pledge not to cheat, plagiarize, steal, or lie in matters related to academic work.

**IMMUNOLOGY BICD140
SPRING 2020**

SCHEDULE FOR LECTURES & EXAMS AND READING MATERIAL

Lecture 1: March 31. Overview of the Immune System. Adaptive vs. Innate Immunity. Read Chapter 1, 3rd Edition.

Lecture 2: April 2. Innate Immunity. Read Chapter 2, 3rd Edition.

Lecture 3. April 7. Innate Immunity cont. Read Chapter 2, 3rd Edition.

Lecture 4: April 9. Adaptive Immunity. Read Chapter 3, 3rd Edition.

Lecture 5: April 14. Antibodies: What are they, what do they do and how do they come to be? Read Chapter 4, 3rd Edition.

Lecture 6: April 16. B cell development and rearrangement of antibody genes. Read chapter 6, 3rd Edition.

Lecture 7: April 21. EXAM# 1, including all material covered and reading material assigned for lectures 1-6.

Lecture 8: April 23. T cell recognition of antigen. Read chapter 5, 3rd Edition.

Lecture 9: April 28. T cell recognition of antigen cont. Read chapter 5 & 15 (15-1~15-10), 3rd Edition.

Lecture 10: April 30. T cell development. Read Chapter 7, 3rd Edition.

Lecture 11: May 5. T cell development cont. Read Chapter 7, 3rd Edition.

IMMUNOLOGY BICD140
SPRING 2020

Lecture 12: May 7. T cell activation. Read Chapter 8, 3rd Edition.

Lecture 13: May 12. T cell activation cont. Read Chapter 8, 3rd Edition.

Lecture 14: May 14. EXAM #2, including all material covered and reading material assigned for lectures 8-13.

Lecture 15: May 19. B and T cell collaboration. Read Chapter 8 & 9, 3rd Edition.

Lecture 16: May 21. B cell activation and antibody mediated immunity. Read Chapter 9, 3rd Edition.

Lecture 17: May 26. Hypersensitivity. Read Chapter 12, 3rd Edition.

Lecture 18: May 28. Autoimmunity. Read Chapter 13, 3rd Edition. This lecture will be taught by Dr. Ye Zheng.

Lecture 19: June 2. Vaccines and infectious disease. Read Chapter 11&14, 3rd Edition.

Lecture 20: June 4. Tumor immunity. Review Chapter 16, 3rd Edition.

FINAL EXAM: June 8th. 3:00p - 6:00p including all lecture and reading material assigned for the entire course with emphasis on material and reading assigned for lectures 15-20.
