1 Course Objectives

This course examines theories of international trade in goods and services, as well as international flows of labor and capital, and analyzes trade policies. The course presents the principle of comparative advantage and its application to classical and modern trade theory. Focusing on the long-term effects of international economic integration, the course discusses the motives for trade policies and presents the economic effects of trade barriers and trading blocs on industrial competitiveness, income distribution and welfare.

2 Prerequisites

Economics 1A-B-C. Recommended: Economics 100A-B or 170A-B.

3 Readings

Required textbook: Krugman and Obstfeld (2003)

Required readings: Leamer and Levinsohn (1995), Feenstra (1998), Krugman (1993), Mussa (1993), Horlick and Palmer (2001), Rodrik (1992), Porter (1990), Freeman (1995), Rodrik (1998), Williamson (1998)

Recommended readings: Ohlin (1931), Grossman and Helpman (1995)

The required and recommended readings (articles and book chapters) are available as custom materials from AS Soft Reserves (copyright fees apply). Most

required readings can also be accessed through the class web page (see link above) and the UCSD electronic library.

4 Problem Sets

There will be three problem sets, due on scheduled dates throughout the quarter. You are encouraged to work on the problems with your classmates. Your teaching assistants will hold review sessions to help you approach the problems. Your solutions to the problem sets will be checked (check/no check) and your performance on them will be part of the final grade. Problem sets have to be handed in *before* 12:00pm on the due date.

Problem sets 1 through 3 will contain five exam-like questions, each counting three points. Problem set 3 will have one open question in addition, counting five points.

5 Assessment

There will be two midterm exams and a final exam. The first midterm exam is mandatory and will take 50 minutes. The second midterm is optional and will take 80 minutes. The final exam will take 120 minutes and is mandatory. All exams are cumulative. Your overall grade will be based on your total score in the two mandatory exams and three problem sets.

Problem sets:	50 points (15+15+20 points)	10/15, 11/5, 11/26
Midterm 1 (50 minutes):	50 points	10/17
Midterm 2 (80 minutes):	80 points, optional	11/6
Final (120 minutes):	120 points	12/8 (finals week)

If you choose to take the optional second midterm exam, your overall score includes the score of this midterm by default. However, if you are not satisfied with your performance on the optional second midterm and do not want the score to count towards your final grade, you may state this by Friday, November 17.

The first and mandatory midterm will be held on 10/17 during lecture time. The second and optional midterm will be held on 11/6 in the late afternoon. The final and mandatory exam will be held on 12/8 at 11:30am. (Problem sets have to be handed in *before* 12:00pm on the due date.)

If you choose not to take the optional second midterm exam, or you do not want it to count towards your final grade and state so by Friday, November 17, the score in all other exams and problem sets will be scaled up by a factor of 15/11 (300/220).

Final *letter grades* will be inferred from the typical grade distribution in economics classes at UCSD.
