

***Preliminary --- Subject to Change***  
**ECONOMICS 200B --- MICROECONOMIC THEORY**  
**MARKETS AND WELFARE**

The principal text for (most of) the first five weeks of the course is Starr, *General Equilibrium Theory: An Introduction*. Corrigenda for the first edition is available on the class webpage. Draft chapters for the second edition are available on the class webpage. Use the draft second edition chapters and let Ross know of typos or errors. In addition we will use Mas-Colell, Whinston, and Green, *Microeconomic Theory*, Varian, *Microeconomic Analysis, 3rd edition*, Kreps, *A Course in Microeconomic Theory*, Arrow and Scitovsky, *AEA Readings on Welfare Economics*, Laffont, *Fundamentals of Public Economics*, Feldman, *Welfare Economics and Social Choice Theory* and additional readings.

Lectures on sections II – VI will parallel the treatment in Starr's *General Equilibrium Theory: An Introduction*. Please read the designated portion of Starr on each topic before the class meeting on it.

Items shown with a bullet (•) are required reading for Economics 200B. Items shown with an asterisk (\*) on the syllabus were once designated by the UCSD Economics faculty as sufficient preparation for the qualifying examination in microeconomics for these topics. \*-designated material overlaps and extends •-designated material; suggestion: read both. Material denoted by a dagger (†) is intended to provide additional depth and breadth for the topic presented but is not intended to appear on a class or qualifying examination.

There will be weekly problem sets required. There will be a take-home midterm and take-home final exam.

**I. Partial Equilibrium, Comparative Statics, Consumer Surplus and Compensation Tests**

- \*Mas-Colell, Whinston, and Green, chap. 10. Appendix M.E
- \*Varian, chaps. 10, 13
- \*Kreps, sections 8.1 - 8.3
- Feldman Ch. 7
- \*Starrett, *Foundations of Public Economics*, chap. 14

**II. The Robinson Crusoe model; the Edgeworth Box in Consumption and Factor allocation**

- Starr, *General Equilibrium Theory: An Introduction* (draft second edition) chap. 1
