Economics 130: Public Policy

<http://econ.ucsd.edu/~vramey/econ130.html>

In this course, we will be using the analytical tools of economics to study issues of public policy. My goal is for you to acquire a basic set of tools for policy analysis, as well as a better understanding of many of the public issues of our time.

Prerequisites: Introductory Microeconomics and an enthusiasm for issues of public policy.

Required reading: (1) Roger LeRoy Miller, Daniel Benjamin, and Douglass North, *The Economics of Public Issues*, 16th edition; and (2) Assigned readings available through internet links, including explanatory material I have written and links to articles in the *Economist*, etc.

Other requirements: Regular class attendance is important because the lectures will contain information not included in the readings. I will post partial notes before lecture that you should print out and bring to class. Also, we will discuss several chapters from the Miller, Benjamin and North book and news articles on a weekly basis. You will be expected to have read them in advance. You should also stay informed about current events and public policy debates by reading a good newspaper. As UCSD students, you have free access to periodicals, such as *The New York Times* and *The Economist*.

Problem Sets & Pop Quizzes: I will hand out problem sets, which are not to be turned in. However, carefully doing the problem sets (without first looking at the answers) is essential for scoring well on exams. On “Discussion Days,” which are usually held once per week, there is the possibility of an unannounced pop quiz at the start of class, consisting of 4 simple True-False questions about the readings assigned for discussion that day. I will give about 4-5 pop quizzes during the quarter. The lowest pop quiz grade will be automatically dropped.

Exams: There will be two midterms and one final exam, scheduled as follows:

1st midterm: Friday October 15

2nd midterm: Wednesday November 17

Final exam: Wednesday December 8, 8:00 – 11:00 a.m.

I do not give make-up midterms. In case of serious illness, family emergency, or an urgent event, you must contact me before the exam (unless you are completely incapacitated) and we will talk about reweighting your other grades.

Grades:	Quizzes:	10 %
	First Midterm:	20 %
	Second Midterm:	20 %
	Final:	50 %

Make-up Lectures: I will be in Europe giving talks the week of October 11 – 15. We will have make-up lectures October 4, 7:00 – 8:20 p.m and possibly November 1, 7:00 – 8:20 p.m. During the week that I am gone, there will be review sessions during lecture time, with a midterm on Friday Oct. 15.

Office Hours: My office hours are Mondays and Fridays 10:10 – 11:10 a.m. My office is Room 326 in the Economics Building.

Course Outline

MBN refers to Miller, Benjamin and North *The Economics of Public Issues*. Many of the online links must be accessed through UCSD. If you are off campus, you can set up a proxy server. See <http://libraries.ucsd.edu/services/computing/remote-access/index.html> for more information. Because linking to *The Economist* articles through the UCSD library is cumbersome, I will post them in a password protected folder at: <http://econ.ucsd.edu/~vramey/econ130/protected/index.html> . I will announce the password in class. If all else fails, use Google to search the title, source, and date of the article.
