Examinations and Grading

- Midterm = 100 points; cumulative (COMPREHENSIVE) final = 300. Grades will be curved.
- Exams are open book; you also may use your own notes from this class;¹ a calculator is required. No bathroom breaks during 1-hour midterms. If you arrive late to an exam, I allow you to take the exam in the time that remains *as long as no one has turned in an exam and left the room*. Once a classmate has turned in an exam, you will earn a zero on the test if you arrive late.
- Regrade period is 1 week after exam papers first returned in class.
- No rescheduled or make-up exams. You MUST take the final with the rest of the class on schedule during finals week. (Make your travel and wedding plans accordingly, and if you are going to have too many finals on one day, drop one of the courses.) If you miss a midterm for a verifiable medical, legal or sports reason, your midterm grade will be your grade on the final. You must notify me promptly that you will miss the midterm or I will give you a zero. Unexcused absences also result in a zero.

¹ You may not use notes purchased from an outside source, nor those from previous offerings of this course.

Study Tips

- Attend class and take notes. Do the practice problems at the end of my lecture outlines. The answers are provided. If you cannot do a problem, we will show you how during office hours.
- Consult the folder of old exam questions at WebCT. Even though I will not discuss these old exams (for a variety of reasons), they are still helpful in cluing you in on things you might not understand as well as you thought. Don't panic if you can't do every question, because the course has changed over the years. Some questions are not relevant for this course this term.
- There are usually a lot of problems at the ends of chapters of textbooks. Often, the answers are provided for the even-numbered or odd-numbered problems.
- Unless I specifically tell you otherwise, READ THE BOOKS! They are written by teachers who want to help you learn this subject.
- If you start to get lost, see me or a TA. We can help! But don't wait until the final is 2 days away.

My Pet Peeves

- The UC may begin offering on-line courses, but this is not one of them. If you don't plan on coming to the lectures, please drop the course.
- My view of grades is that they certify attainment of a particular level of competence in a subject or field. They are NOT a reward for effort, but rather for achievement. I am horribly offended when students beg me to raise their grade because they "need" a better mark. I do not honor such requests. Would you like to go under the anesthetic on the operating table knowing that your surgeon got thru medical school by begging for passing grades?
- I give multiple versions of tests several times each year. What would you do with a student who had the right answers for one of the OTHER versions of the test?
- A lot of cheating takes place during the last few minutes of an exam when papers are handed in. In Spring 2010, 4 students handed in their midterms after I declared "pencils down," and 3 of them subsequently got caught cheating on the final. So I know what I am talking about. If you don't hand your exam in when I call "Time," I will reduce your score by half.
