

Dr. Stephanie Mel

Office: 4070E York Hall

Office hours: Tuesdays 2:30 – 3:30 PM, or by appointment, or find me in lab!

Email address: smel@ucsd.edu (please put BILD 4 in the subject line)

Lecture: Tuesday **In person:** 5:00 PM – 6:20 PM in Galbraith Hall 242
Simultaneously on Zoom – see Zoom LTI in Canvas for link

Schedule of Laboratory Meetings:

Section #	Day	Time	Building	IA's
A01	Wed	9 – 11:50 AM	TATA 2301	Jiyoung and Akshay
A02	Wed	9 – 11:50 AM	TATA 2302	Justin and Akshay
A03	Wed	9 – 11:50 AM	TATA 2303	Jarrold and Maddie
A04	Wed	9 – 11:50 AM	TATA 2304	Sang and Maddie
A05	Friday	9 – 11:50 AM	TATA 2301	Jiyoung and Akshay
A06	Friday	9 – 11:50 AM	TATA 2302	Justin and Akshay
A07	Friday	9 – 11:50 AM	TATA 2303	Jarrold and Maddie
A08	Friday	9 – 11:50 AM	TATA 2304	Sang and Maddie
A09	Wed	1 – 3:50 PM	TATA 2301	Yuwei and Ishaan
A10	Wed	1 – 3:50 PM	TATA 2302	Rhys and Ishaan
A11	Wed	1 – 3:50 PM	TATA 2303	Renyi and Alex
A12	Wed	1 – 3:50 PM	TATA 2304	Adrian and Alex
A13	Friday	1 – 3:50 PM	TATA 2301	Yuwei and Ishaan
A14	Friday	1 – 3:50 PM	TATA 2302	Rhys and Ishaan
A15	Friday	1 – 3:50 PM	TATA 2303	Renyi and Alex
A16	Friday	1 – 3:50 PM	TATA 2304	Adrian and Alex

Instructional Assistants:

Name	email
Akshay Baradwaj	abharadwaj@ucsd.edu
Maddie Brown	mobrown@ucsd.edu
Yuwei Cao	yuc408@ucsd.edu
Adrian Castillo	adc040@ucsd.edu
Ishaan Gupta	i3gupta@ucsd.edu
Rhys Newcomb	knewcomb@ucsd.edu
Justin Pi	jmp_i@ucsd.edu
Alex Wen	awen@ucsd.edu
Sang Woo	saw013@gcloud.ucsd.edu
Jarrold Yee	jdyee@ucsd.edu
Jiyoung Yun	jiy259@ucsd.edu
Renyi Zhao	rzhao@ucsd.edu

Course introduction:

Welcome to Introductory Biology Laboratory! BILD 4 aims to develop an understanding for research in the biological sciences through discovery-based laboratory experiments. We will work in teams to collect, analyze, and present original research data while learning foundational biological concepts and laboratory skills. Data collected in this course will contribute to an on-going research project on soil microbiomes at the Scripps Coastal Reserve on campus.

Learning goals:

- Collaborate with one another to learn foundation biological concepts and laboratory skills
- Apply knowledge of molecular biology concepts and molecular techniques to plan experiments, explain and troubleshoot results.
- Demonstrate proficiency at the basic molecular biology techniques used in the lab.
- Explain the importance of proper controls in designing experiments and interpreting results.
- Perform basic lab math skills, statistical analysis, and graphing.
- Draw conclusions based on evidence and reasoning.
- Use basic bioinformatics databases and applications.
- Find, read, and evaluate primary literature.
- Collaborate with one another to learn foundation biological concepts and laboratory skills.

Components of the course:

- Class: Learn biological concepts related to the laboratory research project
- Laboratory: Engage in a collaborative research project on soil microbiomes on campus
- Project: Propose a research question and present your project via a group constructed poster.

Learning in this course:

BILD 4 is designed to be a collaborative environment for everyone to learn together and construct a shared understanding of the material. Active participation and contribution in classes and in the laboratory are essential because many ideas and laboratory methods that will be developed in these activities cannot be easily captured otherwise. Being able to communicate understanding, articulate confusion, and defend scientific arguments based on evidence and reasoning is both useful for learning and critical to success in any discipline. To encourage collaboration and community building, many class and laboratory activities and assignments will be done in teams, and grades will not be assigned on a curve.

Instead of memorization, we will focus on developing an understanding of fundamental concepts and laboratory skills as they apply to different examples and learn to draw conclusions based on evidence and reasoning. We will utilize class and laboratory time to construct and apply our knowledge, troubleshoot challenging topics, practice problem solving, and develop skills in critical thinking. Laboratory reports and the research proposal will challenge us to think critically about data and experiments.

Smith et al (2009) Science 323: 122-124. <http://science.sciencemag.org/content/323/5910/122.short>

Course Logistics:

The core learning components in this course are comprised of collaborative activities in class meetings and laboratory sections, in addition to independent and group work on studying and completing assignments. Course materials, announcements, and other important details will be available on the Canvas (<https://canvas.ucsd.edu/>). Please check the course website and your @ucsd email regularly for updates and relevant information

Course materials:

Laboratory activities are detailed in the BILD 4 Laboratory Manual, available at the bookstore. Each student will need to purchase a copy of the BILD 4 Laboratory Manual. For the laboratory, knee-length laboratory coat and UV-blocking safety glasses or goggles are required, and they are also available at the bookstore. Students also need to double mask or wear an N95 in lab.

Podcast:

Class meetings will be recorded and made available online as a resource for learning (<http://podcast.ucsd.edu/>). The lecture is also recorded on Zoom (see Canvas).

Grading:

BILD 4 has five grading components: contribution (10%), writing assignments (28%*) quizzes (28%*) final presentation (28%), and professionalism (1%). Final grades will be determined based on percentages out of 100%. There are no opportunities for extra credit beyond what is assigned as part of the course. *The higher of the writing assignment or quiz score will be adjusted to 33% of the course grade. Possible extra credit is worth 0.1% of the grade.

The general grading scheme is as follows, although it may be adjusted to improve everyone's grades if necessary. BILD 4 is not graded on a curve, i.e. 20% of students getting A, B, C, and such. Thus, the ability to do well in this course is not dependent on others doing poorly.

A+	97-100%	B+	87-90%	C+	77-80%	D+	67-70%	F	0-60%
A	93-97%	B	83-87%	C	73-77%	D	63-67%		
A-	90-93%	B-	80-83%	C-	70-73%	D-	60-63%		

Contribution: Active participation is essential to learning in this course. There will be many contribution items, including pre-laboratory assignments, attendance in lab, laboratory notebooks and data collection. Contributions will be graded for thoughtful completion. Because individual students may have different competing schedules and life events, completing 90% of the contribution items will earn the full contribution grade.

Writing assignments: There will be 4 writing assignments throughout the quarter. The assignments will focus on generating figures from data collected by all groups in each laboratory section and drawing conclusions that are supported by evidence and reasoning in scientific arguments. Two of the writing assignments will be done individually and two will be done as a group. Please see Canvas throughout the quarter for more details on these assignments.

Quizzes: There will be 3 short quizzes throughout the quarter, and 1 long cumulative quiz at the end of the quarter. You can drop the lowest short quiz score but you cannot drop the cumulative quiz score.

Final Presentation project: The project will be a research proposal written and presented in poster format collaboratively in teams. Each team will identify a topic to study hypothetically and then propose experiments to investigate that topic using foundational concepts and laboratory skills learned in the course. An individual component will involve summaries and critical assessments of other posters. Please see Canvas throughout the quarter for more details.

Professionalism: This portion of the course grade is intended to engage students in considering the impact of their actions on their own learning and the learning of others in the course. Unprofessional interactions consume time yet have no meaningful benefits to you, your fellow students, and/or the instructional team. Analogously in the workplace, being unprofessional to your colleagues or supervisors will only discount you. When you are discounted, you may not be invited for new opportunities that you may or may not be aware of.

Professionalism can be demonstrated through individual and community efforts. The individual component is to account for demonstrating maturity and professionalism. By default, every student is assumed to be professionally mature. Hence, this component is awarded to every student at the beginning of the quarter. During the quarter, based on observations by the teaching team, which includes but is not limited to one-on-one interactions, electronic communications, promptness and active participation in lab, your professionalism credit may be deducted in steps of 0.5 or 1%.

Attendance, active participation and contribution in all laboratory sessions are required. Being late or missing laboratory sessions without a valid excuse is unprofessional and will result in deductions from the course grade. We understand that emergencies do happen **and in case of emergencies, please contact Dr. Mel or your IAs as soon as possible.** Excused absences due to medical reasons require documentation from a physician.

Example interactions with meaningful benefits that result in the following are desired:

- Deeper insight into course material, course concepts, biology, and/or society in general
- Improvement in skill building and future opportunities
- Learning conceptually and meaningfully why full credit was not awarded for an assignment
- Reporting errors or problems in class or laboratory, assignments, or other course material

Example interactions that have no meaningful benefits that should be avoided:

- Asking questions when the information is already available or will eventually be known
- Ignoring the directions or requests from the instructional team
- Harassing and/or bullying the instructional team or other students, either in person or online
- Being late to lab, or missing class without an acceptable excuse
- Contributing inequitably to group work in lab

Additional enrollment and waitlist policies are available online (<https://biology.ucsd.edu/education/undergrad/course/waitlist.html>).

Being more than 15 minutes late to lab without a legitimate excuse will result in the following grade deductions:

- First time: 1% deduction of professionalism grade
- Second time: 5% deduction of professionalism grade (i.e. loss off all professionalism points)
- Third time or subsequent times: deduction of an additional 5% of the course grade for each time

Being more than 30 minutes late without a legitimate excuse will count as a missed laboratory session and will result in deduction of 10% of course grade for the first laboratory session missed. Missing more than one laboratory session without a legitimate excuse will require the student to drop the course.

Possible Extra Credit: (0.1%) Contributing to the class community is greatly valued in this course. If 90% or more of all students complete CAPEs, instructional assistant evaluations, and other course-based evaluation surveys in a mature and professional fashion, i.e. taking them seriously and providing timely and constructive feedback, every student in the course will be awarded 2 additional contribution points.

Late or missing assignments:

No late contribution items will be accepted, as completing 90% of all the contribution items will earn the full contribution grade. No late assignments will be accepted for the writing assignments or the final project, except in the case of a documented short-term illness or serious family emergency. In this case, please contact Dr. Mel as soon as possible or as soon as it is reasonable to do so.

Group work:

A major goal of the course is to learn to collaborate with others. Unfortunately, despite best efforts and intentions, groups do not always function optimally. Dealing with these challenges is a natural part of the learning experience. Everyone is expected to contribute fully and equitably to group work as part of the university learning community.

If significant disputes occur over the relative contribution of individual members of the group, students can submit an appeal. In such cases, the group grade will be multiplied by the number of people in the group, and the points can be divided among individuals based on what each group member thinks they deserve based on their effort. To submit an appeal, all members of the group need to get together and provide the following information in a document: clear and detailed descriptions of each member's contribution, calculations for how the points should be divided among the members, and signatures from each member with a statement attesting to the fact that everyone in the group has agreed to all information in the appeal document. Please submit the appeal to Dr. Mel at the end of a class meeting within one week of the assignment being returned.

Laboratory safety:

Safety precautions are crucial in the laboratory setting. Biology lab safety training and assessment (<https://biology.ucsd.edu/education/undergrad/course/ug-labs.html>) must be completed by the beginning of the first laboratory meeting. Students will not be allowed to participate in any laboratory section without completing this online training and assessment.

From the beginning of the first lab, appropriate laboratory attire is always required. Appropriate laboratory attire includes long pants or equivalent, long socks or equivalent, and closed-toe and closed-heel shoes. No skin should be exposed from the waist down at all times. Starting at the beginning of the second lab, personal protective equipment (PPE) is required. PPE includes laboratory coats that cover to the knees and UV-blocking safety glasses or goggles, both of which are available at the bookstore.

Library guide:

<http://ucsd.libguides.com/bild4>

A specific library guide has been designed for BILD 4. This website serves as the starting point for navigating campus library resources that support our needs in completing major assignments, such as the research proposal. Please feel free to schedule a consultation with Bethany Harris (bethany@ucsd.edu), our biomedical librarian, for further assistance.

Writing and Critical Expression Hub:

<http://commons.ucsd.edu/students/writing/index.html>

The Writing and Critical Expression Hub provides support for undergraduates working on course papers, i.e. laboratory reports and the research proposal, as well as other independent writing projects. Writing mentors can help at any stage of the writing process, from brainstorming to final polishing. The Writing and Critical Expression Hub offers: one-on-one writing tutoring by appointment; supportive and in-depth conversations about writing, the writing process, and writing skills; help with every stage in the writing process, walk-in tutoring; and workshops on writing.

Accessibility and inclusion:

<http://disabilities.ucsd.edu> | osd@ucsd.edu | 858-534-4382

Any student with a disability is welcome to contact us early in the quarter to work out reasonable accommodations to support their success in this course. Students requesting accommodations for this course due to a disability must provide a current Authorization for Accommodation (AFA) letter issued by the Office for Students with Disabilities (OSD). Students are required to present their AFA letters to faculty and to the OSD Liaison in the Division of Biological Sciences in advance so that accommodations may be arranged. Whenever possible, we will use universal designs that are inclusive. For example, colors used in this syllabus are distinguishable by most colorblind and non-colorblind people, and this font is designed to be dyslexic friendly. If you have feedback on how to make the class more accessible and inclusive, please get in touch!

Discrimination and harassment: The Office for the Prevention of Harassment & Discrimination (OPHD) provides assistance to students, faculty, and staff regarding reports of bias, harassment, and discrimination. OPHD is the UC San Diego Title IX office. Title IX of the Education Amendments of 1972 is the federal law that prohibits sex discrimination in educational institutions that are recipients of federal funds. Students have the right to an educational environment that is free from harassment and discrimination.

Students have options for reporting incidents of sexual violence and sexual harassment. Sexual violence includes sexual assault, dating violence, domestic violence, and stalking. Information about reporting options may be obtained at OPHD at 858-534-8298, ophd@ucsd.edu, or <http://ophd.ucsd.edu>. Students may receive confidential assistance at CARE at the Sexual Assault Resource Center at 858-534-5793, sarc@ucsd.edu, or <http://care.ucsd.edu>, or Counseling and Psychological Services (CAPS) at 858-534-3755 or <http://caps.ucsd.edu>.

Students may feel more comfortable discussing their particular concern with a trusted employee. This may be a student affairs staff member, a faculty member, a department chair, or other university official. These individuals have an obligation to report incidents of sexual violence and sexual harassment to OPHD. This does not necessarily mean that a formal complaint will be filed.

If you find yourself in an uncomfortable situation, ask for help. The university is committed to upholding policies regarding nondiscrimination, sexual violence, and sexual harassment.

Academic integrity:

<https://students.ucsd.edu/academics/academic-integrity/index.html>

Integrity of scholarship is essential for an academic learning community. In this course and at the university, we expect that both students and the instructional team will honor this principle and in so doing protect the validity of university intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. Instructors, for their part, will exercise care in planning and collaborating with students on academic work, so that academic integrity is upheld.

When people collaborate to work toward a common goal, shared values must be established so that everyone understands the acceptable ways for working together. In organizations, these are commonly called codes of conduct or ethics. In this course, we are using a statement of values⁴ in support of codes of ethics, like the Policy on Integrity of Scholarship, to state explicitly our values and describe the behaviors for maintaining and protecting those values.

The following values are fundamental to academic integrity and are adapted from the International Center for Academic Integrity. In our course, these values are open to discussions and possible alterations based on mutual agreements among all students and the instructional team. In collaborative work, each group should discuss these values and must articulate the expectations for how they are made manifest within the group’s work together.

	As students, we will ...	As the instructional team, we will ...
Honesty	<ul style="list-style-type: none"> Honestly demonstrate your knowledge and abilities according to expectations listed in the syllabus or in relation to specific assignments and exams Communicate openly without using deception, including citing appropriate sources 	<ul style="list-style-type: none"> Give you honest feedback on your demonstration of knowledge and abilities on assignments and exams Communicate openly and honestly about the expectations and standards of the course through the syllabus and in relation to assignments and exams
Responsibility	<ul style="list-style-type: none"> Complete assignments on time and in full preparation for class Show up to class on time and be mentally physically present Participate fully and contribute to team learning and activities 	<ul style="list-style-type: none"> Give you timely feedback on your assignments and exams Show up to class on time and be mentally and physically present Create relevant assessments and class activities
Respect	<ul style="list-style-type: none"> Speak openly with one another while respecting diverse viewpoints and perspectives 	<ul style="list-style-type: none"> Respect your perspectives even while we challenge you to think more deeply and critically

	<ul style="list-style-type: none"> ● Provide sufficient space for others to voice their ideas 	<ul style="list-style-type: none"> ● Help facilitate respectful exchange of ideas
Fairness	<ul style="list-style-type: none"> ● Contribute fully and equally to collaborative work, so that we are not freeloading off of others on our teams ● Not seek unfair advantage over fellow students in the course 	<ul style="list-style-type: none"> ● Create fair assignments and exams and grade them in a fair and timely manner ● Treat all students and collaborative teams equally
Trustworthiness	<ul style="list-style-type: none"> ● Not engage in personal affairs while on class time ● Be open and transparent about what we are doing in class ● Not distribute course materials to others in an unauthorized fashion 	<ul style="list-style-type: none"> ● Be available to all students when we say we will be ● Follow through on our promises ● Not modify the expectations or standards without communicating with everyone in the course
Courage	<ul style="list-style-type: none"> ● Say or do something when we see actions that undermine any of the above values ● Accept a lower or failing grade or other consequences of upholding and protecting the above values 	<ul style="list-style-type: none"> ● Say or do something when we see actions that undermine any of the above values ● Accept the consequences (e.g. lower teaching evaluations) of upholding and protecting the above values

All course materials are the property of the instructor, the course, and University of California, San Diego and may not be posted online, submitted to private or public repositories, or distributed to unauthorized people outside of the course. Any suspected instances of a breach of academic integrity will be reported to the Academic Integrity Office for review.

⁴ This class statement of values is adapted from Tricia Bertram Gallant Ph.D.
