

BIMM 121- Laboratory in Microbiology - *Pandemic Fall edition*

Course Syllabus*

Instructor: Giorgia Pirino, Ph.D.

Email: gpirino@ucsd.edu

Please include BIMM121 your full name, ID, and IA name in all emails to Dr. Pirino

Touch-base hours with Dr. Pirino (TBD)

Instructional Assistants: Han Chang (hachang@ucsd.edu) and Vivian Cai (j5cai@ucsd.edu)

Course Time as in the Schedule of Classes

Lecture: Tuesdays & Thursdays, 2:00 PM-3:20 PM live via Zoom

Lab: Tuesdays & Thursdays, 3:30 PM-5:50 PM live via Zoom

Course Expectations

Your well-being and learning are my priority. Thus, in the event that any of us needs to quarantine (which, unfortunately, it may likely happen), this remote format will allow the least number of disruptions to your learning, and will allow all of you to succeed without the fear of missing class and assignments.

Course Description

This course is designed to illustrate processes central to microbiology and familiarize students with skills required for handling, working with, and characterizing different microorganisms. Emphasis will be on microbial ecology, microbial genetics, microbial physiology, and microbial evolution. Through inquiry-based experiments, students will be able to appreciate microbes' involvement in health, industry, the environment, and everyday life. Throughout the course, students will receive training in working with live microbes at the bench as well as scientific reasoning, scientific writing, and analyzing microbial genomes via bioinformatics.

Textbook

There is no textbook/lab manual to purchase for the course. It will be provided to students.

Course Website/Canvas

This course is on Canvas (<https://coursefinder.ucsd.edu>) and should automatically appear on your Canvas account as soon as you register for the class. We will use Canvas to post information on experiments, homework, quizzes, schedules, readings and practice material, experimental data,

report guidelines, etc. This website will also be used to post any announcements that pertain to the entire class. Please check the site regularly and update yourself on the information provided.

Lectures & Lab in this online course

1. The situation that each of us is experiencing is a unique and unprecedented, and some of us may be facing new responsibilities and worries. We are making this class as flexible as possible, still ensuring that each of us can progress toward the learning goals.
2. To make this remote class as interactive as possible and to build a sense of community, all of the lectures will be provided *synchronously*, and I encourage all of you to attend. They will also be recorded, and will be available asynchronously on Canvas.
3. Attendance in lecture is not mandatory. However, it will help you understand and provide background for what we will do in the labs. Even though students may watch lectures asynchronously, they are still responsible for the material discussed in lecture and required to submit assignments by the deadline.
4. Labs will be provided *synchronously* and are mandatory. Live lab sessions will be held on Zoom during the regularly scheduled time. You will work in small groups to complete each day's lab assignments. Lab Attendance is required and will contribute to your grade. You must also attend the lab section you are officially enrolled in. You will document each lab's accomplishments in a Daily Lab notebook, and there will be lab assignments based on the work done in lab throughout the quarter.
5. *Life happens...* If you have to miss *one* or *two* lab sections for unforeseen circumstances (i. e. dare emergencies, illness, Covid-19 related issues), contact Dr. Pirino right away. You will still be responsible for the material you missed, but you will be given an alternative way to make up the points missed in lab. Concurrent enrollment in another class or graduate school interviews do not constitute a reasonable excuse to miss class.
6. If illness or family emergencies force you to miss too many labs (more than two), consider taking the course in a different quarter or applying for an incomplete. You need to be in good standing (a passing grade when you apply) to qualify for an incomplete.

Course Point Breakdown	Points	%
Professionalism & Lab Citizenry	20	10
Lab notebook	30	15
Homework		
Lab quizzes	20	10
Writing assignments	90	45
<u>Team Presentations</u>	<u>40</u>	<u>20</u>
Total Points for the course	200	100

Extra credit opportunities will be provided throughout the course.

Grading Scale

Letter Grade	%	Letter Grade	%
A	(93.0-100%)		
A-	(90.0 - 92.99%)	B+	(88.5 - 89.99%)
B	(83.0 - 88.4%)	B-	(80.0 - 82.99%)
C+	(78.5 - 79.99%)	C	(73.0 - 78.4%)
C-	(70.0 - 72.99%)	D	(60.0 - 69.99%)
F	(X < 60%)		

Final grades are calculated on a straight scale and they are not curved. IAs will alternate grading of assignments between the lab sections. This grading system allows fairness among the lab sections and usually excludes the need of normalizing final grades among lab sections.

Regrade Requests:

All regrade requests should be submitted in writing *within 5 days* of receiving the graded material.

Reading for the lab

Reading ahead of the course:

I will assume that you all have a basic understanding of, and reasonably good memory of the following from lower division biology or from high school. If you don't remember, you may wish to read ahead:

- Scientific Method: brush up on this concept – there are several online sites, including Wikipedia, that do a good job of explaining dependent, independent, and controlled variables as well as the difference between a control experiment and a regular experiment.
- Definition of microbes and an understanding of the different groups of microbes (e.g. bacteria, fungi, viruses). You are not required to memorize all the names – you should, however, have at least a basic idea as to the types of organisms included in each category
- Eukaryotic vs. prokaryotic cells differences
- Metabolic pathways
- Metric system

Reading during the course:

Please read the assigned readings before lecture and/or lab.

As often as possible, I will give you questions/problems to think about that should apply the concepts you learned in class. Thinking about and attempting to answer these questions and

participating in any classroom/lab discussion is the best practice you can have for lab homework and practicing science in general.

Exams

To reduce stress and disruptions, there will NOT be exams throughout the course. Instead, students will complete written assignments (see Lab Schedule)

Assignments Deadlines and Submission:

1. All homework/quizzes/writing assignments will be submitted as electronic copies to Canvas, which will automatically submit them to Turnitin.com. All homework assignments must be submitted on time to be eligible for full credit.
2. **Except in the case of dire emergencies, all assignments submitted after the deadline will receive a penalty. Any submission within the first hour past the deadline is automatically late and loses 20% of the points. Any homework submitted after the first hour past the deadline and within 24 hours from the deadline will lose 50% of the points. No homework will be accepted after the second calendar day.** This policy apply to any assignment in the course.
3. It is your responsibility to verify that the submission has been successful. Do not procrastinate, since unforeseen circumstances may occur (computer problems, illness, etc.). Check the deadline of the assignment submission and make sure you adhere to it. *Students agree that by taking this course all required assignments would be subject to review for textual similarity by Turnitin.com for the detection of plagiarism. All submitted assignments will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers; student names will never be stored in the Turnitin database. Use of the Turnitin.com service is subject to the terms of use agreement posted on the Turnitin.com site.*

Class Participation in this online course

This quarter, BIMM 121 is a remote course. Thus, this course will not be able to reproduce what you would have experienced in a wet lab. However, the remote format will allow the least number of disruption to your learning.

To create community, links to join the video lab sessions will be provided in Canvas. Discussions will be facilitated by the instructional assistants and instructor and are meant to be a time to work collaboratively to analyze data, design experiments, and engage in troubleshooting of results. Students will be working on groups of six and divided in break out rooms. **It is highly recommended that you actively participate because this is an opportunity to ask questions and get feedback.** *We appreciate if you keep your video on during the lectures and main lab sections as it is better to interact with a live person, than a black screen or a photo! IA and I would like to get to know you! And I am sure your experience will be much more rewarding!* More details specific to the lab sections will be provided by your IA.

Your participation and professionalism will be evaluated throughout the course, which includes but is not limited to one-on-one interactions, electronic communication, contributing data to class

data sets according to deadlines, asking questions, answering questions, and follow-up conversations on grades.

Homework & Quizzes:

There will be 2 writing assignments and 2 quizzes (see lab schedule).

Quizzes will open on a Friday (5PM) and are due on the next Sunday, and are not timed. Quizzes will cover what has been covered in lecture (majority of questions) and lab since the previous quiz and until the Tuesday's lecture before its release.

Specifically, Quiz 1 will cover everything from the beginning of the course to Tuesday's lecture (October 12);

Quiz 3 will cover the material covered in lab and lecture since Thursday, October 14, and until Tuesday's lecture (November 9);

The two writing assignments represent an excellent opportunity to practice your scientific writing skills, learning how to write and formulate hypotheses, summarize results, discuss and provide reasoning for claims. Detailed guidelines will be provided.

Lab notebook:

Each student will be assigned an individual digital lab notebook as a Google Doc that you will use for the quarter. These will be made available through the Canvas Site. Complete and organized lab notebook entries are a critical part of effective work in a research lab. As such, we expect students to practice good lab notebook entry habits. Information on how to keep a complete and organized lab notebook will be provided by the end of week 0. **Lab notebook will be regularly checked and graded.**

Professionalism and Lab Citizenry

In addition to quizzes and homework assignments, student evaluations will be based on a series of criteria. Some examples are listed below:

- Developing deeper insight into course material, concepts, biology, and/or society in general
- Working collaboratively to improve in skill building and future opportunities
- Contributing to an inclusive learning environment
- Learning conceptually and meaningfully why full credit was not awarded for an assignment
- Clarifying course material that facilitates deeper learning
- Reporting errors or problems in class, on assignments, or for other course material

- Arriving on-time to lab video sessions and being prepared to work in lab
- Contributing equally to team work
- Asking questions when other teams present their work in the main Zoom room
- Before asking questions, verifying that the information is already available or will eventually be known
- Being respectful of IAs, instructor, and classmates, either in person or online
- Following the directions or requests from the instructional team

Oral Presentations

Presenting ideas and results in an oral format to an audience of peers is a valuable skill to have. On the last day of the course, each team of students will be responsible for providing a 15 minute presentation during lab (specific details will be provided in class). Each member of the team will receive the same grade for the oral presentation. The oral presentations will be evaluated by the instructor, IAs, and peer reviewed by fellow students.

Extra credit opportunities

Description	Due date	Points
Extra Credit (EC) Entry survey	Sep 22 5:00PM	2
Attending 75% lectures		8

Regrade Requests:

All regrade requests should be submitted in writing within 5 days of receiving the graded material. Please check the regrade policy on Canvas for more information.

Statement on Academic Integrity: Integrity of scholarship is essential for an academic community. The University expects that both faculty and students will honor this principle and in so doing protect the validity of University intellectual work. For students, this means that all academic work will be done by the individual to whom it is assigned, without unauthorized aid of any kind. The consequences of being caught cheating can be severe. Information can be found here: <http://www.ucsd.edu/current-students/academics/academic-integrity/index.html>

Students are expected to do their own work, as outlined in the UCSD Policy on Integrity of Scholarship: <http://senate.ucsd.edu/Operating-Procedures/Senate-Manual/Appendices/2>

Academic misconduct will NOT be tolerated. Students suspected of Academic Integrity (AI) violations on exams and/or homework will be invited to Zoom follow-up meetings where they will be asked to (in real time, on video) justify their answers (before the graded exams or solutions are released). If the instructor isn't convinced during the meeting, or the student refuses

to participate, they're submitted for AI violations. Cheaters will receive a failing grade on the exam or assignment, and/or in the course. They may also be suspended from UCSD pursuant to University guidelines.

All class material, such as syllabus, readings, homework, quizzes, scientific articles, lecture slides, etc. are copyrighted and cannot be posted to websites and/or distributed without instructor's approval for any reason. Students that sell and distribute course materials not only violates the student code of conduct, but also violates UC's 2005 policy on the Use of Recordings of Course Presentations: <http://copyright.universityofcalifornia.edu/resources/recorded-presentations.html> .

Academic misconduct includes but is not limited to:

1. **Cheating**, such as using "crib notes", copying answers from another student during the assignments, or forge assignments.
2. **Plagiarism**, such as using the writings or ideas of another person, either in whole or in part, without proper attribution to the author or the source. Copying anything from any source is plagiarism if the source is not clearly cited. Quotations should not be used, since they constitute plagiarism. Plagiarism is stealing someone else's ideas and presenting them as your own.
3. **Collusion**, such as engaging in unauthorized collaboration on exams or assignments, completing for another student any part or the whole of an exam or assignment, or procuring, providing or accepting materials that contain questions or answers to an exam or assignment to be given at a subsequent time.

Student Responsibility:

Students are expected to complete the course in compliance with the instructor's standards. No student shall engage in any activity that involves attempting to receive a grade by means other than honest effort; for example:

- No student shall knowingly procure, provide, or accept any unauthorized material that contains questions or answers to any examination or assignment to be given at a subsequent time.
- No student shall complete, in part or in total, any examination, or assignment for another person.
- No student shall knowingly allow any examination or assignment to be completed, in part or in total, for himself or herself by another person.
- No student shall plagiarize or copy the work of another person or internet sources and submit it as his or her own work.
- **If any work is plagiarized from that of another student, both students will be reported to the Office of Academic Integrity, even if one of the students has graduated already.**

Remember that most graduate schools check the undergraduate records for any indications of dishonesty before awarding a degree.

- No student shall alter/forged graded class assignments or examinations and then resubmit them for regrading.
- No student shall submit substantially the same material in more than one course without prior authorization.
- No student shall post class material on online websites without instructor's approval

Please sign the following pledge by Monday of week 1: <https://academicintegrity.ucsd.edu/forms/form-pledge.html>

The link is also available through Canvas, under the academic integrity on the Canvas menu (on the left of your screen). Click on "Academic integrity", open the URL, from the menu on the home page (across the top) click on "Form", scroll down, then click on "Take the Pledge". After completing the pledge, you will receive a confirmation email. Please forward it to your IA.

Statement on Office for Students with Disabilities (OSD): To receive accommodation, students must present or email their "Authorization for Accommodation" (AFA) form provided by the Office for Students with Disabilities (OSD) to the instructor. Considering that students will complete assignments from home and they are not timed, no extra time will be given.

Discrimination and Harassment: The University of California, in accordance with applicable federal and state laws and university policies, does not discriminate on the basis of race, color, national origin, religion, sex, gender, gender identity, gender expression, pregnancy (including pregnancy, childbirth, and medical conditions related to pregnancy or childbirth), physical or mental disability, medical condition, genetic information, ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services (including membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services). The university also prohibits harassment based on these protected categories, including sexual harassment, as well as sexual assault, domestic violence, dating violence, and stalking. The nondiscrimination policy covers admission, access, and treatment in university programs and activities.

If students have questions about student-related nondiscrimination policies or concerns about possible discrimination or harassment, they should contact the Office for the Prevention of Harassment & Discrimination (OPHD) at (858) 534-8298, <https://ophd.ucsd.edu/>, or <http://ophd.ucsd.edu/report-bias/index.html>

Campus policies provide for a prompt and effective response to student complaints. This response may include alternative resolution procedures or formal investigation. Students will be informed about complaint resolution options. A student who chooses not to report may still contact CARE at the Sexual Assault Resource Center for more information, emotional support,

individual and group counseling, and/or assistance with obtaining a medical exam. For off-campus support services, a student may contact the Center for Community Solutions. Other confidential resources on campus include Counseling and Psychological Services, Office of the Ombuds, and Student Health Services.

CARE at the Sexual Assault Resource Center: 858.534.5793 | sarc@ucsd.edu | <https://care.ucsd.edu>

Counseling and Psychological Services (CAPS): 858.534.3755 | <https://caps.ucsd.edu>
