A 20-point problem set will be posted online for discussion in section meeting each week. Students are to complete the problem set prior to attending discussion section for the week to the best of their ability. All students must be prepared to contribute to section discussions to earn their discussion section participation points

ASSESSMENT

DISCUSSION SECTION PARTICIPATION (40 POINTS): Discussion sections will begin the week of Monday, September 26th. Weekly discussion sections are important for your success in this course. They will help you develop your analysis and problem-solving ability that will be evaluated by the exams. Discussion sections also provide you with the opportunity to build relationships with fellow students and your Instructional Assistant. **Students are required to attend the 8 mandatory discussion section meetings**

for which they are registered. You will receive 5 points for your active participation in each (5 x 8 = 40). **To obtain full points for participation, you need to attend for the full class period and actively participate in class discussion.**

PROBLEM SETS (160 POINTS): Required problem sets will be posted for each week as designated in the course schedule above. These problem sets are your most valuable study material, as they are designed to reinforce the learning objectives for each lecture and cover the primary concepts. Complete the problem set to the best of your ability prior to your discussion section and then be prepared to contribute to discussing and working through the problems together in your discussion section meeting. **You must submit your problem set through Canvas by 11:59 PM on Friday the week that they are due.** For late submissions, a 10% penalty will be subtracted from your score for each day (i.e. 2 points lost per day). **You must answer these questions in your own words; if you cut and paste wording from slides or paste in screen-captured images, you will not receive points.** If students turn in assignments which have been in any way copied from a key used for previous classes, they will receive an automatic zero for the assignment. If students do not make a good-faith effort to complete problem sets to the best of their ability prior to attending section, and do not participate in a rigorous discussion, then due date/times will be moved to require submission during your section meeting. Eight problem sets will be assigned throughout the quarter for a total of 160 points (20 points each).

EXAMS (300 POINTS): There will be three equally weighted exams for the course, two midterms and a final exam, each worth 100 points. **All Exams will be administered in-person only in our lecture hall on Tuesday October 18, Tuesday November 10, and Thursday December 8.** The exams are **NOT cumulative**, and exam questions will only cover material taught in class and in the discussion sections for each given module. Study guides for each lecture are provided to assist students in anticipating types of exam questions and material covered on the exams.

COURSE POLICIES

COMPLIANCE WITH MANDATED COVID-19 SAFETY PRACTICES: For in-person attendees, compliance with all UCSD COVID-19 mandated safety practices is essential to maintaining our collective capability to attend in person. In brief, all persons must be properly masked at all times in classrooms. You may not remove your mask to eat or drink in the classroom. Please also avoid removing your mask in crowded outdoor areas while waiting to enter the classroom. You must also complete and pass your daily symptom check prior to coming to classes in person; do not come to class in person if you are exhibiting any symptoms. Many of your fellow UCSD community members live with unvaccinated minors or with persons that have health conditions that increase their risk of illness; please be mindful of this fact and respect others in your actions and compliance with safety mandates. If you are notified by contact-tracing that you must quarantine due to a known COVID-19 exposure, you must comply with this mandate. There is no penalty for students that must quarantine! All components of the class can be completed remotely if needed. Please notify your Instructor and Instructional Assistant if you are required to quarantine.

EXAMS: Exams will be 80 minutes in length. Questions will include several types of questions such as multiple-choice, short answer questions, labeling structures, true/false and other types of questions. There will be no make-ups for exams unless you provide documents for medical or family emergency with contact information. **You must contact the instructor about the situation before the exam** to discuss your options. Once you have taken an exam (or part of it), you will not be able to drop the score or

negotiate a reduction of its impact on your grade for any reason. If you do not take the exam, your grade will be a zero. Once exams have been graded, you will be able to view your score at the course website. After the quarter you will also be able to view your final exam score and final grade at this location.

Students for which the Office of Students with Disabilities have been issued exam accommodation letters should present their letter at the beginning of the quarter or as soon as it is available. Please contact Dr. Huffaker at least one week prior to each exam to arrange for accommodation.

ADMINISTRATIVE QUESTIONS: To drop/add a class or with other similar questions/issues, please contact the Biology Undergraduate Student Affairs Office.

UCSD POLICY ON ACADEMIC INTEGRITY: Cheating or academic dishonesty will not be tolerated, and all academic work will be completed by the student to whom it is assigned without assistance. As defined by UCSD policy, academic dishonesty includes:

- Taking an exam for another student or allowing another student to take an exam for you
- Copying another student's work on an exam or allowing another student to copy your work
- Seeking answers to exam questions on any website/social media platform, etc.
- Altering graded exams or assignments and submitting them for a regrade
- Communicating with other students during the exam
- Bringing answers or cheat sheets to the exam in note form or using a calculator, phone or other electronic device

Any student caught or suspected of cheating by doing one of the things on the list above will be reported to the UCSD Academic Integrity Coordinator and the Dean of the student's college. Confirmed cases of cheating on exams or altering an exam and submitting it for a regrade will result in the student receiving an automatic F as their final grade as well as other disciplinary actions determined appropriate by the Academic Integrity Coordinator.
