

COURSE SCHEDULE

TuTh WLH 2005: 11am – 1:50pm

Date	Lecture#	Planned Topic	Lodish (<i>Chapter: Pages</i>)
<i>Genes & Genomes</i>			
Tu 8/4	1	DNA, DNA Replication	Overview, Central Dogma 2: 36-37; 4: 115-120 4: 145-151
Th 8/6	2	Telomeres DNA repair Genes & genomes <i>Sequencing</i>	6: 273-275 4: 151-159 6: 223-231 5: 195-197
Tu 8/11	3	Noncoding & Mobile DNA <i>PCR</i> Recombinant DNA <i>Gene inactivation</i> <u>QUIZ 1 DUE ON TED @ 10AM</u>	6: 231-245 5: 192-193 5: 182-198, 201-206. 5: 212-216
<i>Basic Mechanisms of Gene Expression</i>			
Th 8/13	4	Transcription <i>Northern blotting</i>	4: 124-127; 7: 290-297 5: 198
Tu 8/18	5	Midterm (in class; covers Lectures 1-4) Eukaryotic Pol-I, -II, -III transcription rRNA, tRNA processing mRNA capping, polyadenylation <u>QUIZ 2 DUE ON TED @ 10AM</u>	7: 297-305, 336-339 8: 384-391 8: 345-349, 358-360
Th 8/22	6	pre-mRNA splicing Nuclear export Translation mRNA turnover	8: 351-356 8: 365-368 4: 131-144 8: 375-376

Regulation of Gene Expression

Tu 8/25	7	Transcriptional Regulation: Prokaryotes	7: 282-285
		TR in Eukaryotes	7: 288-290, 302-305
		Microarrays	5: 199-201
		<u>QUIZ 3 DUE ON TED @ 10AM</u>	
Th 8/27	8	Transcription Activators	7: 305-314, 320-322
		Chromatin	6: 256-266
		Chromatin remodeling	7: 315-320, 323-333
		<i>Chromatin immunoprecipitation</i>	7: 297
Tu 9/1	9	Post-transcriptional gene regulation	8: 360-365, 374, 376-384
		Gene regulation by non-coding RNAs	7: 331-335 8: 370-374
		RNA quality control	8: 380
		<u>QUIZ 4 DUE ON TED @ 10AM</u>	
Th 9/3	10	Cancer and Biotechnology	
		Review of Laboratory Techniques	
		<u>ETHICS ESSAY DUE ON TED @ 11:59PM</u>	

9/5 Saturday FINAL EXAM 11:30am-2:30pm

INSTRUCTOR

Dr. Keefe Reuther,

Division of Biological Sciences

Office: HSS (Humanities and Social Sciences Building) 1145D

Office hours: TBA

Email address: kdreuther@ucsd.edu (please put BIMM100 in the subject line)

VENUE

TuTh WLH 2005: 11am – 1:50pm

COURSE PREREQUISITES

BICD100 (Genetics), BIBC100 or BIBC 102 (structural or metabolic biochemistry), and their prerequisites, including BILD1 and organic chemistry. If you feel rusty on the material of the prerequisites, it is strongly recommended that you carefully read Chapters 1-3 and Chapter 5, pp171-182, of the *Lodish* textbook (7th ed), which cover material that is considered prerequisite and will only be mentioned in passing during class.

PURPOSE OF THE COURSE:

Molecular Biology is the study of gene structure, function and regulation at the molecular level. It describes fundamental mechanisms, shaped by evolution, that underlie all known life on our planet - mechanisms that when impaired, for example by mutation or by parasitic interference, lead to human disease. You will be introduced to our current understanding of genome structure and gene expression and the key experimental observations and deductions made by scientists, which have shaped, and continues to shape, our knowledge in this rapidly developing field of biology. As you will learn, this is a field of intense research with new exciting discoveries reported daily.

LEARNING OBJECTIVES:

After taking this class, you should know the key concepts of the central dogma of molecular biology and how insights into these concepts have been gained through experimental observations. You should also be able to interpret, and predict the outcome of, basic experiments to study factors and pathways in molecular biology processes. The specific topics covered include the composition of genomes and the basic mechanisms of replication, transcription, RNA processing, translation and RNA turnover, and how the complexes that perform these activities identify their targets, carry out their function and can be regulated to meet cellular needs.

Doing well in this class requires solid prior understanding of genetics, biochemistry and organic chemistry.

CONTACT:

Your TA's and fellow students are your best resource for information and you should first attempt to answer your questions through them. Contact Dr. Reuther first only for specific issues unrelated to course content. The best way to contact him is by email. On all emails PLEASE put BIMM 100 in the subject line to indicate that the email pertains to this course. Also, if you email a question the evening before an exam please send it before 5 PM. If you email about anything regarding your status in the course, please include your UCSD username, and PID.

TEXTBOOK:

Optional! Lodish et al. 'Molecular Cell Biology' 7th edition, Freeman, 2012 Some nice animations and other helpful material related to the book can be found at the textbook web site:

<http://bcs.whfreeman.com/lodish7e/>

iCLICKERS:

Required. You must register your clicker on TED during week 1. Beginning Thurs. Aug. 6th, you must answer at least 50% of the questions in a single lecture to receive participation points for that lecture. You may miss one lecture during the session and receive full participation credit.

LECTURE:

Lectures will cover the central topics of molecular biology in the order indicated in the schedule, although the specific order can deviate a bit from that indicated, depending on time. The order of the topics discussed during lectures is different from the order in the textbook. The lectures are divided into three sections covering 1) Genes & Genomes, 2) Basic mechanisms of gene expression, and 3) Regulation of gene expression. Along the way, we will discuss key experiments and deductions that underlie the understanding of the different processes. The pages in the textbook corresponding to the material discussed during lectures are indicated in the schedule.

On the day before each lecture (at the latest), a copy of the lecture slides (in pdf format) will be uploaded on the course website. It is highly recommended that you download and print out the lecture slides so that you can follow the lecture by taking notes on it. They comprise a skeletal record of what happens in the lecture. However, you may find the lecture slides unintelligible without your own written notes. Therefore, don't

think of them as a second, independent “book” you can read but instead as a collaborative record of the lecture that you will create.

PODCASTING:

Class lectures are videocast and are available for download soon after lecture. Download videocasts at <http://podcast.ucsd.edu/>

TECHNOLOGY POLICY: The use of cell phones or any other electronic devices is not permitted during exams. Cell phones or other communication devices must be turned off and stored before entering the lecture hall at all times. Use of a cell phone or other similar electronic devices during an exam, quiz or assignment is grounds for receiving a failing grade.

Laptop computer policy: Students are welcome to bring laptops to lecture for note-taking purposes. Laptops must be put away (closed and powered off or on sleep mode) during any lecture quizzes, assignments or exams.

WEB SITE:

Everything related to the class is kept on the TED site (<https://ted.ucsd.edu/webapps/login/>). Announcements of exam room changes and many other important matters will be posted on the TED site. Check the site often! Grades will all be posted on the website.

GRADING:

TED Quizzes (25 points each)	100 points
Ethics Essay	30 points
iClicker Participation Points (5 pts/class)	40 points
Midterm Exam	150 points
Final Exam	250 points
Total	570 points
80% of the class fills out a CAPE (EXTRA CREDIT)	5 points

These guidelines will be used to assign grades:

- > (85%) A (A-, A or A+)
- > (75%) B (B-, B or B+)
- > (65%) C (C-, C or C+)
- > (55%) D

If necessary, these cutoffs will be adjusted downward so that at least 50% of students in the class receive an A or a B, but they will not be adjusted upward for any reason.

MIDTERM EXAM:

MAKE-UP EXAMS ARE NOT AVAILABLE. EXAMS ARE OFFERED AT THE SCHEDULED TIME ONLY. Advise your coaches, teammates, traveling companions, significant others, and families accordingly. The exams will consist of multiple choice, short essay, short answer, and quantitative or graphical material designed to test your ability to synthesize information presented in the lectures and readings. The midterm exam will be based on material up to the lecture preceding the exam unless announced otherwise in class.

FINAL EXAM:

EARLY EXAMS ARE NOT AVAILABLE. Watch for the announcement in class and on the web site about the location. The final will be cumulative, but will primarily focus on material presented after the midterm. **You must have a photo ID to turn in your exam.**

MISSED EXAMS:

There are no make-up exams, so unexcused absences from scheduled exams will be recorded as zeroes. Unusual and serious problems that affect your ability to take a scheduled exam (e.g., death or serious illness in the family or personal tragedy) must be communicated to Dr. Reuther directly. You will be required to provide official documentation of an unavoidable emergency (e.g., serious illness, etc.). Without such documentation, you will receive a zero for that exam. For a missed midterm exam with valid documentation, the remaining midterm and final exam will count for the entire test portion of your grade. For a missed final with valid documentation, you will be issued an incomplete grade, which can then be made up with the instructor after the end of the quarter.

RE-GRADES:

It is your responsibility to check your exam for clerical errors in grading. If a grading error has been made, you should submit a re-grade request to Dr. Reuther at the end of a lecture within one week of return of the exam. The time and date of closing down the appeal process will be announced in class. Simply write “please re-grade Q #” or “arithmetic error on p. #” on the cover of your paper. Write a concise description of the alleged error on a separate, attached piece of paper. No re-grades are possible for exams written in pencil or non-permanent ink. Students who submit exams for re-grading understand that we may (1) re-grade the entire exam, and (2) compare the submitted paper to a scanned copy of the original exam. Since course grades are due with the Division of Biology 72 hours after the final exam is given, re-grades of the final will be handled as follows: Graded final exams will be available for pickup a few days after the final is given. Re-grade

requests are to be placed under Dr. Reuther's office door within one week after graded exams are made available. If the re-grade request is valid and it affects the letter grade of the student in the course, then Dr. Reuther will change your course grade accordingly.

OSD students: Students requesting accommodations and services due to a disability for this course need to provide a current Authorization for Accommodation (AFA) letter issued by the Office for Students with Disabilities (OSD), prior to eligibility for requests. Receipt of AFAs in advance is necessary for appropriate planning for the provision of reasonable accommodations. For more information, contact the OSD at (858) 534.4382 (V); (858) 534-9709 (TTY); osd@ucsd.edu, or <http://osd.ucsd.edu>.

CHEATING: DON'T. Students are expected to do their own work, as outlined in the UCSD Policy on Integrity of Scholarship (go to TritonLink: Academics: Academic success: Academic integrity). Cheating will not be tolerated, and we will report any student caught engaging in academic dishonesty. Their identity and the evidence of cheating will be passed to the relevant campus staff for further action. All exams will be closed book and closed-notes; all personal materials including cell phones must be stowed under your seat while exams are in progress. All assignments are to be completed individually, unless otherwise noted.

SECTIONS AND SECTION MEETINGS:

Students have the opportunity to meet with a Teaching Assistant in relatively small groups on a weekly basis. There will be no sections during the first week of classes.

You must sign up for a Section after the first class meeting using <https://sections.ucsd.edu>. Instructions will be announced in class that day. There is a limit of 35 students for each section. Wait listed students should also sign up for sections now but there is no guarantee that they will eventually become enrolled in the class. **Section attendance is not mandatory.**

The section meetings provide for:

1. Academic review. Each week the TA will provide an opportunity to review the previous week's lectures and readings. This review may take the form of answering your specific and general questions, clarifying something important presented quickly in lectures, expanding on something important described in the textbook, or working through a numerical problem of the type found on the exams. To benefit from these meetings you must prepare by completing both your lecture

notes and the assigned reading. There is no need to bring the textbook to the section meeting.

2. Advice on studying. In particular, the TA's may be able to steer you through the enormous amount of descriptive material in the textbook. They will not know what will be on the exams but they are experienced enough to know how to set learning priorities. They meet with the professor before each class and can give you his advice on what's important and what is less likely to be a focus on exams.

3. General course announcements. We will make numerous announcements about the course and course-related opportunities.

4. General advice. The TA's are a lot easier to find than the professor so please direct your questions about other courses, majors, careers, summer opportunities, study abroad opportunities to them, in the first instance

5. Review of online quizzes and exams.

Schedule of Section Meetings:

Section #	Day	Time	Building	Room	TA
A01	M	11:00a-12:50p	CENTR	207	Scott
A03	W	5:00p-6:50p	CENTR	207	Joon
A04	Th	3:00p-4:50p	WLH	2208	Shannon
A05	F	11:00a-12:50p	CENTR	201	Kirby
A06	Tu	2:00p-3:50p	HSS	2321	Roxana

Be prepared to select your section time using sections.ucsd.edu after the first class meeting.

Instructional Assistants:

<u>Name</u>	<u>email</u>
Fassas, Scott Neil	sfassas@ucsd.edu
Kim, Joon Hyuk	jhk112@ucsd.edu
Tamoria, Kirby Catindig	ktamoria@ucsd.edu
Wiswell, Roxana Ellen	rwiswell@ucsd.edu
Zhang, Shannon Shueyin	ssz002@ucsd.edu

TIPS ON HOW TO DO WELL:

BIMM 100 (like many other university courses) is complex enough to reward the student who gives some thought to how to take it. The most important trick is to keep up. The pace is unrelenting because BIMM 100 must sometimes move rapidly, using 10 lectures to cover the field of molecular biology.

The following practices will help you best prepare for the exams:

1. Print out lecture slides before each lecture.
2. Be present and take good notes during lectures (the lecturer will often use the board for explanation, which slows down the pace and allows you to take notes on the lecture slides).
3. Attend discussion section and prepare well for it. Go through the previous week's material and come up with specific topics or questions for the TA to clarify. Identify the material that is giving you trouble early.
4. Take all the material from lecture, the podcast, the textbook, and the PowerPoints and consolidate it in a fashion that makes sense. The key to understanding and remembering so much complex concepts and terminology is to ORGANIZE, ORGANIZE, ORGANIZE!

In addition, the “Solved Problems” at the end of each *Lodish* Chapter can give useful practice in problem solving.

Since your grade will be decided entirely from your final score and not based on how you do compared to other students in the class, it will never hurt you to help fellow students. In fact, research on learning has shown that whether you are on top of the material or are having a hard time understanding the concepts, you will improve your learning by discussing the material with other students. Participation in study groups and in peer discussion of clicker questions is therefore highly recommended.
