------------------	--	---------------------------------

**Course Content**

This course is the third of three courses in microeconomics and will build on the material presented in Economics 100A and 100B. You need to have taken the prerequisite courses listed in the UCSD catalog. The topics covered include imperfect competition, imperfect information, externalities and public goods. The course emphasizes mathematical analysis in developing the theory, but will also discuss real-world applications to demonstrate the usefulness and importance of the theory.

**Readings**

The required text is *Microeconomics: Theory and Applications with Calculus* (Perloff). You are responsible for the material in the assigned parts of the text. A companion website for the text is available at <http://www.aw-bc.com/perloff/> and has useful study material and interesting applications and extensions.

## Course Outline

1. Review of Perfect Competition	Chapters 3-5, 8-10
2. Monopoly	Chapter 11
3. Pricing Strategies	Chapter 12
4. Game Theory	Chapter 14
5. Oligopoly	Chapter 13
6. Externalities and Public Goods	Chapter 17
7. Economics of Information	Chapters 18 & 19

## Grading and Exams

There will be two exams: one midterm and one final. The midterm will be an **out-of-class midterm** and is worth 40% of your grade. The final is cumulative and is worth 60% of your grade. The midterm and final exams are scheduled (as listed on the UCSD course schedule) for the following dates and will not be offered at any alternative times:

Midterm exam:      Th **April 30** 6:00-7:20pm in Pepper Canyon Hall  
                              Section A00: Room 106  
                              Section B00: Room 109

Final exam:            Section A00: Th **June 11** 8:00-11:00am  
                              Section B00: Tu **June 9** 8:00-11:00am

*Note: If you miss the midterm for a documented, university approved reason (i.e., illness), then the final will count for 100% of your grade. If you miss the midterm for another reason, you will receive a zero. No one will be allowed to start an exam after the first person leaves it.*

You will not be graded on attendance but of course are responsible for the announcements made and material presented during lecture.

## Practice Problem Sets and TA Sections

Practice problem sets will be assigned approximately weekly. They will not be graded and you do not need to turn them in. However, you are strongly urged to take them seriously and attempt all assigned problems. The exams will require that you can solve a variety of analytical problems in a limited amount of time. The best way to succeed in this class is to thoroughly practice solving problems, as well as to read the textbook and review the lecture notes and examples given in class.

The TAs will answer questions and go over solutions to the problem sets during their weekly discussion sections (and solutions will be posted following the weekly sections). It is important that you attend one (or both) of these sections, and attendance will benefit you the most if you have already attempted the problems on your own first.

TA Section A00: Wed 6-6:50pm York 2622

TA Section B00: Wed 7-7:50pm York 2622

### **Administrative Issues**

1. If you choose to use a laptop to take notes during the lecture, you must sit in the back row. No other use of electronic devices is allowed during class.
2. UCSD now has automated waitlists. If you have any questions regarding adding the class, please contact the undergraduate advisors in Sequoyah Hall 245. The university does not allow late additions (additions after the second week) to any class.
3. Any student found guilty of academic dishonesty will earn a failing grade for the course. In addition to this academic sanction, the Council of Deans of Student Affairs will also impose a disciplinary penalty. For UCSD policy, please see <http://www-senate.ucsd.edu/manual/appendices/app2.htm>.
4. You will only need a pen or pencil for exams. You will be provided with paper and do not need to bring bluebooks. Exams are closed-book, closed-notes and you will not be allowed to use calculators. Also, if you use a pencil for your exam, you will not be able to request a re-grade.
5. Regrade requests are only permitted if you took the entire exam in pen. If you believe that an exam has not been properly graded, you must first discuss this with a TA for the course. If after talking to the TA, you would like to have your exam regraded, you must submit a regrade request to me within 7 days from when exams were first returned to the class. You must explain clearly in writing why you believe your score is in error. If you request a regrade, I may regrade your entire exam and your score could go up or down.
