Office Hours: T, 2:00-3:00 pm; Th, 1:00-2:00 pm.

Teaching Assistants:

Kelly Paulson:

ECON 113

Office hours: W 9:30-10:30am.

Samuel Bazzi:

ECON 124

Office hours: M, 9:30-10:30am.

Objective

This course is an introduction to the economics of immigration. The focus will be for the most part on immigration in the last decades to the United States, although other country cases will be covered as well. This course aims at helping you understand the economic causes of immigration, the characteristics of the immigrants to the US, their economic performance, and their impact on the US economy and especially on native US workers. We will also look at alternative immigration policies and their potential economic consequences.

Readings

Required Texts

[Bo] George J. Borjas: *Heaven's Door. Immigration Policy and the American Economy*, Princeton University Press, New Jersey, 2001 **(Required)**

[Han] Gordon Hanson *Why Does Immigration Divide America? Public Finance and Political Opposition to Open Borders*, Institute for International Economics, 2005 **(Required)**

In addition to these two textbooks, we will rely on book chapters, articles from academic journals and newspapers, working papers from research institutions, and web-based documents

Some of the readings are required, while others are optional but strongly recommended. The optional (but strongly recommended) ones will be covered in class.

The slides of the lectures will be posted on WebCT.

Grading

The grade will be determined by four problem sets (PS), one midterm exam, and a cumulative final exam.

The weights are the following: PS 20%, midterm exam 30%, and final exam, 50%. However, if your midterm exam has a higher grade than your final the weights will be 40% for each one.

The problem sets are going to be graded on the following basis: check plus (5 points), check (4 points), check minus (2 points). Your three better grades will be averaged and the lowest grade for the PS will be dropped.

Each problem set will have two sections. The first section will be due on class according to the table below, graded as mentioned, and answers will be posted on the class web site. The second section will serve as a study guide for the exams, but no answer key will be handed out for this section before the exam. The exams will have questions included in the problem sets or variations of them. In any case, solving the problem sets before looking at the answers will be an excellent study guide for the exams.

Problem set #	Date	Due date
1	April 9	April 16
2	April 23	April 30
3	May 12	May 19
4	May 26	June 2

The mid-term exam will take place on Thursday May 7, 2009.

Regrades:

The TAs will do any regrading in a two week period after the PS and exams are returned to the students. No regrades can take place after this period. Any PSs or exams written in pencil or erasable pen are NOT going to be regraded.

There will be neither make-up exams nor late problem sets accepted.

Review sessions:

Please check WebCT and announcements in class.

WebCT will have, in due time, the problem sets and their answers, the slides for each class, answers to the exams, and all other relevant information about the class.

Course Plan

(*) Required reading

Introduction

Harris, J. R. and Todaro, M. P. (1970). "Migration, unemployment, and development: a two-sector analysis". *American Economic Review*, 60, 126-142. (*)
