

Welcome to BIMM 101 Recombinant DNA Techniques!
Section D01 Spring 2010

Instructor: Dr. Ella Tour
(858)-246-0753 (or dial 60753 from campus phone)
etour@ucsd.edu - best way to reach me

Office Hours: Tuesdays, 3-4PM, in Humanities and Social Sciences (H&SS) 1145D or talk to me during the lab (I will be there for most of the 4 hour lab period)

LECTURE: Tuesday and Thursday, 9:30 – 10:40AM, York Hall 3406
Please note: this is a laptop-free class!

LAB: Tuesday and Thursday, 11AM– 3:00PM, York Hall 3406

TA	TA email
Henry Chan	hchan@ucsd.edu
Ben Vitug	bvitug@ucsd.edu

COURSE OBJECTIVES:

- Become proficient at basic molecular biology techniques
- Be able to maintain proper records of your experiments, observations and conclusions
- Understand the theory behind molecular techniques, and the applications of the methodologies in biological research
- Understand the importance of proper controls in designing experiments and interpreting results
- Be able to interpret results and make logical conclusion from experimental data
- Be able to design your own recombinant DNA experiments, including proper controls, using the techniques learned in this course
- Become familiar with bioinformatics websites and literature searching
- Improve lab math skills and ability to graph data correctly
-

BRING TO LAB EACH DAY:

1. Lab Manual
2. Labcoat (the bookstore has cheap ones)
3. UV blocking safety glasses (also at bookstore)
4. Lab notebook with carbon copies (bookstore or Grove general store)
5. Pen (lab notes must be in ink)
6. Calculator
7. Proper attire (long pants, closed-toed shoes - see safety notes in Lab Manual)

LAB SCHEDULE: listed in lab manual

COURSE WEBSITE: webct.ucsd.edu

Please check the webct site before each lab! Important announcements, required reading, guidelines for lab reports/assignments, class handouts, exam study guides, links to websites, etc will be posted on the website.

REQUIRED TEXTS:

- BIMM 101 Lab Manual Winter 2010 (University Readers, Inc. www.universityreaders.com)
- *From Genes to Genomes* by Jeremy W. Dale and Malcolm von Schantz (copies available on Course Reserves, see link on WebCT)
- Readings posted on WebCT

ATTENDANCE:

Remember that lab attendance is required – if you miss two labs, you will be dropped from the course. If you are ill, you must leave a message with me, not your TA, and make up the lab in a way that I will determine. You must be on time for lab; the TAs go over the experiments at the beginning of lab, and also the quizzes are administered then.

GRADING:

- 25% final exam
- 20% lab report
- 25% quizzes
- 20% homework
- 5% lab notebook
- 5% lab performance, attendance, participation in discussions and classroom activities

1. Lab reports: there will be one lab report during the quarter. Specific guidelines and the due date for each lab report will be posted on WebCT.

Although you will be doing the experiments and collecting data with a partner, you must hand in your own lab report, in your own words. **Copying someone else's lab report or homework is cheating (see below).**

2. Exam: There will be one cumulative final exam on Tuesday, June 1st, between 11AM – 1PM, in York Hall 3406 (our lab). All students are expected to take their exam at the scheduled time. The only valid excuses for missing an exam are severe illness or family emergency. You must notify the instructor prior to the scheduled exam in order to be considered for a make-up exam. Reasons for make-up examinations must be clearly documented (e.g., doctor's note) and to be requested in writing. If justified, a 20 min oral exam will be scheduled by the instructor.

3. Homework: there will be several homework assignments due throughout the quarter, such as summaries of bioinformatics labs, preparation or summaries of paper discussions. Specific guidelines for each assignment will be posted on WebCT.

4. Quizzes: There will be 4 quizzes altogether on the following dates: April 8, 20, 29 and May 13. The quizzes will be given at the beginning of the lab, and will include materials from lecture, lab and the required reading. In addition, small (1-2 question) quizzes will be occasionally given during some of the lectures.

5. Lab notebook: it is mandatory that you keep a lab notebook, with carbon paper. The notebook must contain the following (see back of lab manual for more details):

- i. The date, title and purpose
- ii. Briefly, what you did, including any changes in protocol
- iii. All data/results
- iv. All calculations done during experiments
- v. Observations
- vi. Immediate conclusions from your experimental results

The carbon copy of your lab notebook **must be turned in** at the end of each lab period. Selected labs will be graded.

6. Lab performance/attendance/participation in discussions and lecture activities:

A. One unexcused absence will result in points off your participation grade; more than one unexcused absence will result in you failing the course.

B. Your lab performance includes your effort, how well you follow lab safety regulations and the quality of your experiments. In addition, attention will be paid on how you follow the rules of sterility and proper bacteriological techniques.

C. Lecture activities: numerous studies on how college students learn have shown that when students are actively engaged in the process of learning (when they answer questions, explain things to each other, etc.), they understand and retain the acquired knowledge better. In order to promote active learning, I will be asking you questions, on which you will either have to vote or submit a very short answer on an index card. Your answers will also help me to evaluate my own teaching.

LATE POLICY: lab reports and homework assignments are due at the beginning of the lab on the assigned date. For each day thereafter (including weekend days), you will lose 10% off the lab report grade.

REGRADE POLICY

All requests for regrades must be submitted in writing to me (regrades for quizzes and exams) or to your TA's (lab reports, carbon copies). To submit for a regrade, you must write a cover letter specifying which specific problem should be looked at and fully describe why you think it was wrongly graded. Attach the cover letter to the assignment/exam and deliver it to me or the TA. The regrade request must be delivered within 1 week after the assignments are returned. In some cases, I will regrade the entire assignment/test/lab report.

Exams, quizzes and homework assignment **must be written in pen** or will not be accepted for regrade. Exams written in pen but having the writing masked by any form of white-out or correction tape will not be accepted for regrade.

POLICY ON CHEATING: anyone caught cheating (includes plagiarizing lab reports, cheating on a test, or changing an answer for a regrade) will be reported to the Academic Integrity Office.

STUDENTS WITH DISABILITIES

Reasonable accommodations will be provided for qualified students with disabilities. If you have any disability that may impair your ability to complete the course successfully, please contact me during the first week of the course.

LETTERS OF RECOMMENDATION:

As a general rule, I will write letters only for those who receive a B or above in this course. If you think you may want me to write you a letter of recommendation, be sure to talk to me during the lab and my office hours: ask questions, offer your own ideas and interpretations of your results, bring interesting facts/papers that are connected to the material we are studying. By doing so, you will allow me to observe your way of thinking, which in turn will allow me to write a more meaningful letter of recommendation for you. Also, please save your lab reports and tests, for I will ask for some of them to review.

OPPORTUNITIES TO GET TO KNOW YOUR CLASSMATES, TA'S AND INSTRUCTOR:

This lab offers more personal settings than some of the big classes at UCSD. I encourage you to take this opportunity and talk to your TA's and to me about any course- or career-related issues. It is also a great idea to exchange email addresses/phone numbers with a few people in your class (for example, your bench-mates), in case you'll have questions or would like to form a study group – always a good idea! We will have two potlucks during this quarter (on April 15 and May 6) that will also offer an opportunity for social mixing.

Lab Reports

All lab reports for the class must be independently written, i.e., **your own work in your own words**. While discussion of data among lab partners is encouraged, each student on their own must complete all text, references, figures, graphs, and tables. The submission of reports by lab partners that contain shared work is forbidden, and will result in points being deducted from both reports. The exception to this is when a figure is the raw data that is supplied to each member of the group (specifically absorption spectra and gel photographs). In this case the labeling of that figure must be done independently. If you have questions about the difference between discussing your work with others and unauthorized collaboration, please ask your instructor or TA for clarification.

Because lab reports are to be your own work in your own words, you may not copy to any extent current or past laboratory reports that were written by other students. This is known as plagiarism, which is a direct attempt by the student to present the work of others as their own, and is no different than cheating on an exam. Directly copying material from other sources without putting it in your own words is also plagiarism, even if the source is cited as a reference. Plagiarism in lab reports is rigorously sought out and penalized.

Students are required to upload an electronic version of each lab report to Turnitin.com, where the report is screened with a plagiarism checker against all reports in the Turnitin database. All incidents of plagiarism will automatically be turned in to the Academic Integrity Coordinator. Following UCSD's Policy on Integrity of Scholarship (www-senate.ucsd.edu/manual/appendices/app2.htm), students found to have committed plagiarism or other academic misconduct will receive both an administrative (decided by the Council of Deans) and academic penalty (decided by the instructor). Furthermore, all submitted reports are retained in the Turnitin database. Similarity hits by the plagiarism checker will also reveal the name of the student who provided the plagiarized material. Giving one's own lab report to other students to allow them to copy material from that report is also academic dishonesty, and will be pursued and penalized as rigorously as for the student committing the plagiarism.
