

BIMM 101 Recombinant DNA Techniques - Spring 2019
Sections F01, F02,

Instructor: Chris Day cdday@ucsd.edu Office: HSS 1145LA

Instructional Assistants:

F01	Junneng (Kevin) Wen;	juw095@ucsd.edu
F02	Antoinette Ronquillo;	anronqui@ucsd.edu

Lecture: TuTh; 6:30-7:50pm YORK 4080A

Laboratory: WF, 9:00-12:50pm in York 3306 (F01) or York 3406 (F02)

Office Hours: Monday 10:00-11:00am (HSS 1145L) - we often have time in lab or at the end of lab when they end early, so please take advantage of these times to discuss things with me too.

Required materials

1. BIMM 101 Lab Manual
2. Carbon copy or carbonless copy notebook (bookstore) for taking lab notes
3. Other readings occasionally posted on TED
4. Lab Coat (must be to knees)
5. UV-blocking safety glasses
6. Long pants or equivalent, close-toed and closed-heel shoes
7. Fine point Sharpie (dark color) for labeling tubes
8. Calculator or cell phone calculator

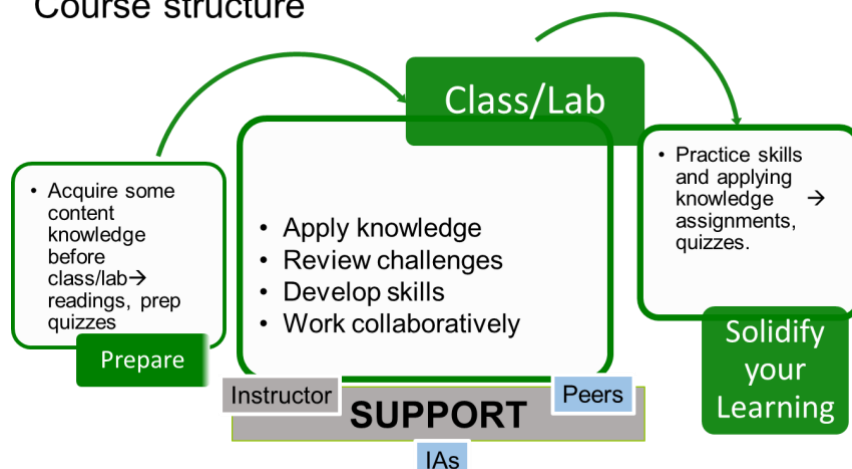

Learning goals:

- Apply knowledge of the theory behind molecular techniques, and the applications of the methodologies in biological research, to explain experimental steps and troubleshoot results
- Apply knowledge of molecular biology concepts relevant to our work to explain and troubleshoot results
- Demonstrate proficiency at basic molecular biology techniques
- Explain the importance of proper controls in designing experiments and interpreting results
- Perform basic lab math skills, statistical analysis, and graphing
- Draw logical conclusions from experimental data and justify conclusions
- Use basic bioinformatics databases and applications
- Learn to find, read, and evaluate primary literature

Learning in this course

This course is designed to be a collaborative environment for everyone to learn together and construct a shared understanding of the material. Active participation both in class and lab is expected. Being able to communicate understanding, and confusion, is critical to success in any discipline, and is very useful for learning¹. To encourage communication and collaboration, we will frequently use class time to work on problems in groups.

Course structure

We like to use class time to work on applying knowledge, troubleshooting difficult topics, and practice solving problems. Hence, it is expected that you will prepare before coming to class, reviewing basic background information about the lab and/or relevant content. This will be encouraged through targeted readings and in-class quizzes. The more prepared you are for class and lab, the more fruitful our discussions can be.

Instead of memorization, we will focus on developing an understanding of fundamental concepts and as they apply to the experiments. Therefore, tests will include questions that are based on solving problems in new contexts or data interpretation and not necessarily on memorizing facts.

Smith et al., 2009. <http://www.sciencemag.org/content/323/5910/122.short>

Grading

There are four components of grading in this course: Lab Mini Reports, Participation, Quizzes and the Final

Laboratory mini reports and assignments: 35%

Guidelines and rubrics for each of the mini reports and assignments will be posted on TED and due dates announced on TED and in class. Reports will be submitted to Turnitin on TED and hard-copies must be submitted in person within 5 minutes of the due date time.

There are 5 mini reports and an assignment:

- Gel electrophoresis mini report– 3%
- PCR variations mini report – 5%
- Ligation efficiency – 7%
- Promoter Mutagenesis – 9%
- RNAi – 11%

Participation: 15%

a. Lab notebooks, 10% (10 randomly graded, 1% each)

Instructions about what to include in your notes will be posted on TED.

b. Lab efficiency and professionalism (5%): It is important to be diligent when working in the lab: make sure you are following protocols, pay attention to supplies, and use your time effectively. It is also very important to work collaboratively and effectively with others, including dividing tasks equally (one person should not do all tasks). Your lab efficiency and professionalism score will be based on two components:

- i. For efficiency and effectiveness. This is not to say that mistakes are not permitted, mistakes happen. However, if you *chronically* make mistakes, misuse supplies, perform unsuccessful work, you will be docked points.
- ii. For professionalism and collaboration. This mark is based on observations of your behavior in the lab.
- iii. IA's will have closed pop quizzes (a single question at the start of lab) that should be easy to answer **if you have read ahead for that day in lab**. Reading ahead is important since you will make fewer errors during the lab and be more efficient. We must finish the experiments in the allotted time.

Quizzes: 24%

Starting in Week 2, there will be a short quizzes, usually at the start of Thursday lab. This will be on material covered the prior week and quiz week. The quizzes will be open book. There will be 8 quizzes, your top 6 scores will be used for the final grade.

Final: 26%

The final is cumulative and worth 26%. Part one of the final will also be open book (lab manual + class notes), calculators are permitted, but no electronic devices. Part two of the final will involve demonstrating proficiency in computer software and tools that you use throughout the quarter. The final will take place during the last lab (4 hours are available, but normally the final can be finished in 2 hours).

Grades will be based on your percentage in the course:

97+ = A+	94 up to 97 = A	90 up to 93 = A-
87 up to 89 = B+	83 up to 86 = B	80 up to 82 = B-
76 up to 79 = C+	72 up to 75 = C	67 up to 71 = C-
60 up to 66 = D	Below 60 = F	

This course is not graded on a curve (i.e. 20% of students getting A, B, C, and such), and the ability to do well in the course is not dependent on others doing poorly.

Absences:

Lab attendance is required – if you miss one lab with no excuse, you will lose 5% from your final grade. If you miss two labs, you may be asked to drop the course. If you are ill, you must get in touch with me, not your IA, and make up the lab in a way that we will determine. You must be on time for lab, multiple late arrival may be counted as an absence.

Late and missed assignments and quizzes

Late assignments will be subject to a 10% deduction per day, up to a maximum of 2 days late (after which you will receive a 0). There are no make-up quizzes offered except in the case of a documented medical or family emergency (in which case we will decide how to go about the make-up testing).

Laboratory safety

Safety precautions are crucial in the laboratory setting. As such, appropriate personal protective equipment (PPE), including laboratory coats that cover to the knees, UV-blocking safety glasses or goggles, long pants or equivalent, and closed-toe and closed-heel shoes, are required. **You must take the lab safety module quiz prior to the start of Lab 2.** You can find the safety module here:

<http://biology.ucsd.edu/education/undergrad/course/ug-labs.html>

Academic integrity (<https://students.ucsd.edu/academics/academic-integrity/index.html>)

Integrity of scholarship is essential for an academic community. The University expects that both faculty and students will honor this principle and in so doing protect the validity of University intellectual work. For students, this means that all academic work will be done by the individual(s) to whom it is assigned, without unauthorized aid of any kind. Anyone caught cheating (includes plagiarizing lab reports, cheating on a test, or changing an answer for a re-grade) will be reported to the Academic Integrity Office.

Inclusion and accessibility (<http://disabilities.ucsd.edu>)

Any student with a disability is welcome to contact us early in the quarter to work out reasonable accommodations to support your success in this course. Students requesting accommodations for this course due to a disability must provide a current Authorization for Accommodation (AFA) letter issued by the Office for Students with Disabilities (OSD), which is located in University Center 202 behind Center Hall. Students are required to present their AFA letters to faculty and to the OSD Liaison in the Division of Biological Sciences in advance so that accommodations may be arranged. For further information, contact the OSD at 858-534-4382 or osd@ucsd.edu.
