

BIMM 101 Recombinant DNA Techniques Winter 2010

Dr. Stephanie Mel
smel@ucsd.edu
858-822-0603

Office hours: Monday 1 – 2 PM or in class
York 4070 E

Lectures: York 3010 T-Th 8 – 9:20 AM 122 PCYNH
Labs: York 4318 and 4332 T/Th 9:30 AM – 1:30 PM and W/F 9:00 AM – 1:00 PM

Learning objectives:

- Learn the theory behind molecular techniques, and the applications of the methodologies in biological research
- Become proficient at basic molecular biology techniques
- Learn the importance of proper controls in designing experiments and interpreting results
- Improve lab math skills and ability to graph data correctly
- Learn to make logical conclusions from experimental data
- Become familiar with bioinformatics databases and applications
- Learn to find, read, and evaluate primary literature
- Become aware of the implications of the technology for society

TAs:

Tu/Th	Marito Hayashi Mary Nguyen	mahayash@ucsd.edu man001@ucsd.edu
W/Fr	Tyler Van Buren Maria Mihaylova	tyler.vanburen@gmail.com mmihaylova@ucsd.edu

Required texts:

BIMM 101 Lab Manual from University Readers
From Genes to Genomes by Dale (2nd edition) also on reserve in BML

Required Materials – needed by second day of class:

Labcoat (the bookstore has cheap ones)
UV blocking safety glasses (also at bookstore)
Lab notebook with carbon copies (bookstore or Grove general store)

Remember that lab attendance is required – if you miss two labs, you will be asked to drop the course. If you are ill, you must leave a message with me, not your TA, and make up the lab in a way that I will determine. You must be on time for lab; the TAs go over the experiments at the beginning of lab, and also pop quizzes are administered then.

Grading:

1. Quizzes: Starting the week of Jan. 11th, there will be a quiz on every Tuesday or Wednesday at the beginning of lab. The quiz will cover the lecture and lab experiments from the previous week. There will be eight quizzes, each of which is worth 4% of your final grade, except for the quiz in week 5, which will be worth 8%. Total = 36% of final grade.

2. Homeworks and lab reports: there will be 1 lab report worth 15% of your grade and two shorter homeworks worth 7.5% of your grade each. Total = 30%.

Although you will be doing the experiments and collecting data with a partner, you must hand in your own homeworks and lab report, in your own words. **Copying someone else's lab report or homework is cheating (see below). You must submit your lab report to Turnitin.com**

Note that in presenting data, much of your homework and lab grade will depend on correct labeling of figures and graphing of data.

Late policy: homeworks and lab reports are due at the beginning of the lab on the assigned date. For each day thereafter, you will lose 10% off the total.

4. Lab performance (4%) Your lab performance grade will be based on your class attendance, effort, attitude, and the success of your experiments. If you miss one lab with no excuse, you will lose these points.

5. Exams: there will be a cumulative final, worth 30% of the grade, given in lecture on Thursday March 11th

6. Lab notebook: it is mandatory that you keep a lab notebook, with carbon paper. The notebook must contain the following (see back of lab manual for more details):

- i. The date, title and purpose
- ii. Any changes in protocol
- iii. All data/results
- iv. All calculations done during experiments
- v. Observations

You will need to attach carbons of relevant labs to all homeworks and lab reports you hand in (I will indicate on the lab report which lab #s to include).

Policy on cheating: anyone caught cheating (includes plagiarizing lab reports, cheating on a test, or changing an answer for a regrade) will be reported to the Academic Integrity Office.

Note: Just coming to lab does not ensure that you will get a passing grade in the class. You must hand in all assignments and get passing scores on those assignments (an average of 65) to get a C- in the class.

1. I understand that if I am late for lab on a day a quiz is given, I will not be allowed to take the quiz and will receive a 0 score for that quiz.

Date

All lab reports for the class must be independently written, i.e., **your own work in your own words**. While discussion of data among lab partners is encouraged, each student on their own must complete all text, references, figures, graphs, and tables. The submission of reports by lab partners that contain shared work is forbidden, and will result in points being deducted from both reports. The exception to this is when a figure is the raw data that is supplied to each member of the group (specifically absorption spectra and gel photographs). In this case the labeling of that figure must be done independently. If you have questions about the difference between discussing your work with others and unauthorized collaboration, please ask your instructor or T.A. for clarification.

Because lab reports are to be your own work in your own words, you may not copy to any extent current or past laboratory reports that were written by other students. This is known as plagiarism, which is a direct attempt by the student to present the work of others as their own, and is no different than cheating on an exam. Directly copying material from other sources without putting it in your own words is also plagiarism, even if the source is cited as a reference. Plagiarism in lab reports is rigorously sought out and penalized. Students are required to upload an electronic version of each lab report to Turnitin.com, where the report is screened with a plagiarism checker against all reports in the Turnitin database. All incidents of plagiarism will automatically be turned in to the Academic Integrity Coordinator. Following UCSD's Policy on Integrity of Scholarship (www-senate.ucsd.edu/manual/appendices/app2.htm), students found to have committed plagiarism or other academic misconduct will receive both an administrative (decided by the Council of Deans) and academic penalty (decided by the instructor). Furthermore, all submitted reports are retained in the Turnitin database. Similarity hits by the plagiarism checker will also reveal the name of the student who provided the plagiarized material. Giving one's own lab report to other students to allow them to copy material from that report is also academic dishonesty, and will be pursued and penalized as rigorously as for the student committing the plagiarism.

2. I understand that if I plagiarize a lab report and it is detected by Turnitin.com, the matter will go to the Academic Integrity Office on campus. I also understand that if I give a lab report to a student who takes the lab in a subsequent quarter, and he or she plagiarizes my lab report, I will also be subject to disciplining by the Academic Integrity Office.
