## BIMM 121 Laboratory in Microbiology Winter 2012

4070 C York Hall <a href="mailto:lchilukuri@ucsd.edu">lchilukuri@ucsd.edu</a> 858-822-2032

Office hours: Mondays 2-3 pm. Location: 4070C York Hall

**Lecture**: Tuesday/Thursday 8:00 – 9:20 in 2622 York Hall – right by the lab

**Labs**: York 2310 and 2332

Tuesday/Thursday: 9:30 am - 1:30 pm Wednesday/Friday: 9:00 am - 1:00 pm

#### **Course Structure:**

This course will introduce you to the fundamentals of microbiology and allow you to explore the many ways in which microbes affect and are used in our lives. We begin the course with a foundation in basic techniques such as sterile techniques, microscopy, methods of quantitating microbes, and preparing and examining stained slides. The remaining duration of the course will comprise four main units: a comprehensive look at bacterial physiology, understanding the complex microbial community of soil, metagenomics as a tool in exploring complex communities, and the use of microbes in various aspects of our lives. Each of these units comprises several multi-day experiments and there will be considerable overlap in the execution, methodology, and analysis of data from each of these units. Throughout the course, you will also receive training in accurate data entry and analysis, scientific reasoning, and in clear and concise scientific writing.

### **Equipment:**

For this lab you will need to purchase:

- A lab notebook (bound notebook, regular or spiral bound). Carbon notebook not necessary. Loose leaf binders not allowed.
- A lab coat
- Eye protection (you may wear either safety glasses or goggles, but standard <u>prescription</u> eye glasses are not sufficient).
- A Sharpie permanent marker pen, preferably fine point (not extra fine or regular)

#### **Attendance and Absences:**

- 1. Your attendance is required at EVERY lab and through the entire lab period, until all the experimental work for the day is completed.
- 2. Absences will NOT be treated lightly. The labs are set up for groups of two or more and your absence will place an unnecessary burden on your partner. There are no make up labs and you will not be allowed in the lab on non-lab days or in the other Micro lab sections, although you may be asked to make up the work from the day you missed.
- 3. Documentation will be required for all unavoidable absences.
- **4.** If you are likely to have interviews for graduate school, etc., please schedule them on non-lab days.
- **5.** All absences without prior notification/permission and the appropriate paperwork will be considered unauthorized.
- **6. 50-point penalty** for the first unauthorized, unexplained absence from the lab. If there is a second such absence, you will be asked to drop the course or will be given an F.
- 7. If you are ill on a lab day or have an emergency, e-mail or call (instructor or lab partner) <u>before</u> the start of the lab. If you are ill enough to miss lab you must go to the student health center and provide documentation of your illness.

## **Lab report Deadlines and Submission:**

- 1. A hard copy of each lab report is due in the first 20 minutes of the lab period or the first 20 minutes of the lecture period of the day on which your report is due. Check with your instructor as to where the report should be turned in. Reports turned in more than 10 minutes after the start of class will be considered late. Penalty for late reports will be 10% for each day late.
- 2. In addition to the hard copy of the report, you are required to submit an electronic copy to Turnitin.com. A link to the e-submission website will be provided on Ted. Failure to submit on Turnitin.com will results in 0 (zero points) recorded for that report. Check the deadline of the Turnitin.com submission and make sure you adhere to it. Students agree that by taking this course all required papers would be subject to review for textual similarity by Turnitin.com for the detection of plagiarism. All submitted papers will be included as source documents in the Turnitin.com reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin.com service is subject to the terms of use agreement posted on the Turnitin.com site.

Turnitin submission is **not required for Homework** assignments are not required to

3. Additional points may be taken for late electronic submissions.

# Regrade Requests:

All regrade requests should be submitted <u>in writing</u> within one week of receiving the graded material.

## **Grading Scheme**

Quiz/Report/Midterm	Points
Classroom evaluation	70 points
Safety	
Notebook checks	
Techniques	
Pop quizzes	
TA eval	
Homework	100 points
Lab Reports (3)	230 points
Lab report 1: Data analysis	-
Lab report 2: Unknown	
Lab report 3: Enrichment & Metagenomics	
3 Midterms	250 points

## **Most Likely Grade Distribution**

A = 90% - 100%

Total

B = 80% - 89.9%

C = 70% - 79.9%

D = 60% - 69.9%

F = below 60%

#### Notebook:

Spiral bound or composition notebook is OK. All notebooks should have a table of contents (handwritten OK) so on the first lab day leave several blank pages at the beginning of your notebook. Number your pages. Entries should be made in chronological order and EVERY day. Each day's entries on each experiment should begin with a brief (1 - 2 sentences) summary of work done on the same experiment the previous day.

650 points

#### How to use your notebook

Table of contents – update everyday – leave at least 4-5 pages for updating Start a new page each day for each new experiment:

Purpose of experiment

Procedure

Outline or page from which protocol was taken

Note any changes

Note who did which part of the procedure – who inoculated controls, etc

Note which organisms you used – name and species of the controls, etc

**Errors** 

Observations

Write – in detail

Draw – enlarged, labeled, and including as much detail as possible Questions and connections

Conclusion or summary

Answer any questions in the manual or that were raised in class.

Number your pages

You may leave space to complete an experiment. When the experiment is complete and all observations have been made, cross off any blank pages or parts of pages following the written portion.

## Lab Performance and Participation

In addition to quizzes, midterms, lab reports and howmework assignments, student evaluations will be based on the following criteria:

- 1. Lab techniques will be evaluated in class
- 2. Lab workshop participation

Subjective student evaluations will be based on the following criteria:

- **3.** Pre-lab preparation
- **4.** Careful management of lab procedures (e.g., sterile technique, proper waste disposal, experimental procedures, etc.)
- 5. Ability to adapt to unforeseen procedural changes
- **6.** Caliber of thinking before asking questions
- Scientific approach (e.g., proper use of notebooks, controls, experimental design)
- 8. Accuracy
- 9. Independence

- 10. Safety consciousness
- 11. General neatness in lab

Please note: You will be expected to get into the habit of methodical, well-planned and organized work by the mid-term. This will help you with the experiments in the second half of the course.

#### Course Website

This course is on Ted (https://ted.ucsd.edu) and should automatically appear on your Ted account as soon as you register for the class. We will use Ted to post information on experiments, exams, schedules, readings and practice material, experimental data, report guidelines, etc. We strongly encourage you to use the Discussion board to post questions or answers to questions and to use it as a forum for exploring the material. The TAs and I will routinely check this website and answer any questions but feel free to respond as well. This website will also be used to post any announcements that pertain to the entire class. Please check the site regularly and update yourself on the information provided.

## **University Policy on Integrity of Scholarship**

The principle of honesty must be upheld if the integrity of scholarship is to be maintained by an academic community. The University expects that both faculty and students will honor his principle and in so doing protect the validity of University grading. This means that all academic work will be done by the student to whom it is assigned, without unauthorized aid of any kind. Instructors, for their part, will exercise care in planning and supervising academic work, so that honest effort will be encouraged.

## **Student Responsibility:**

Students are expected to complete the course in compliance with the instructor's standards. No student shall engage in any activity that involves attempting to receive a grade by means other than honest effort; for example:

- No student shall knowingly procure, provide, or accept any unauthorized material that contains questions or answers to any examination or assignment to be given at a subsequent time.
- No student shall complete, in part or in total, any examination, or assignment for another person.
- No student shall knowingly allow any examination or assignment to be completed, in part or in total, for himself or herself by another person.
- No student shall plagiarize or copy the work of another person and submit it as his or her own work.

- If any work is plagiarized from that of another student, both students will be reported to the Office of Academic Integrity, even if one of the students has graduated already. Remember that most graduate schools check the undergraduate records for any indications of dishonesty before awarding a degree.
- No student shall alter graded class assignments or examinations and then resubmit them for regrading.
- No student shall submit substantially the same material in more than one course without prior authorization.

# Homework Assignments With midterm and report due date info

**General guidelines:** There will be 8 homework assignments during the quarter. Most homework will be posted on Ted, at the latest by Tuesday morning. Unless otherwise specified, homework will be due in lecture the next Tues. Work submitted after the first half hour of lecture will be considered late and will automatically receive only 50% credit. Descriptions of the homework assignments, the date of posting, due dates, and the point values are given below.

Midterms and lab report due dates, and workshop dates are listed in italics.

Homework # and name	Description	Points	Date material/guidelines	Date due
HW 1: Library pre- workshop survey	A brief anonymous online survey to assess student familiarity with course and with utilization of UCSD Library resources. Survey to be taken and submitted online	10	Tues Jan 3 <sup>rd</sup>	8 am: Tues Jan 10 <sup>th</sup>
HW 2: Data organization and representation	Reorganize, analyze, and represent raw data in the form of a table and figure	10	Tues Jan 10 <sup>th</sup>	Tues Jan 17 <sup>th</sup>
HW 3: Reading, summarization, annotation	Read and understand the assigned article. Provide summary and annotate the specified number of references	20	Tues Jan 17 <sup>th</sup>	Tues Jan 24 <sup>th</sup>
Data Analysis Workshop	3 hour workshop to learn the fundamentals of data analysis and begin work on Lab Report 1			Thurs/Fri Jan 26 <sup>th</sup> /27 <sup>th</sup>
Midterm 1	Midterm on listed topics. In lecture			Tues Jan 31st
Library Research Workshop	90 minute hands on workshop to go over library research methods			Thurs/Fri Feb 2 <sup>nd</sup> /3 <sup>rd</sup>
HW 4: Online library tutorial	Complete online library tutorial and associated online quiz	20	Tues Jan 24 <sup>th</sup>	Tues Feb 7 <sup>th</sup>
Lab Report 1	Water contamination data analysis			Tues Feb 14 <sup>th</sup>
HW 5: Dilution	Complete and turn in dilution problem set	10	Tues Feb 7 <sup>th</sup>	Thurs Feb 16 <sup>th</sup>

Midterm 2	Midterm on listed topics in lecture or lab			Tues/Wed Feb 21 <sup>st</sup> /22 <sup>nd</sup>
HW 6: Worksheets	Complete and turned in assigned worksheets based on daily reading	10	Tues Feb 21 <sup>st</sup> /Wed Feb 22 <sup>nd</sup>	Thurs/Fri Feb 23 <sup>rd</sup>
Flow chart	Create flow chart to facilitate easy identification of genus of unknown organism.	Inc in report	Thurs/Fri Feb 23 <sup>rd</sup> /24 <sup>th</sup>	Due with Lab Report 2
Lab Report 2	Identification of unknown organisms			Thurs/Fri March 1 <sup>st</sup> /2 <sup>nd</sup>
HW 7: Growth curve	Plot data obtained from class experiment	10	Tues/Wed Feb 28 <sup>th</sup> /29 <sup>th</sup>	Tues/Wed Mar 1 <sup>st</sup> /2 <sup>nd</sup>
HW 8: Library post- workshop survey	A brief anonymous online survey to assess student improvement in library research skills following Library workshop	10	Tues Mar 1 <sup>st</sup>	Tues/Wed Mar 13 <sup>th</sup> /14 <sup>th</sup>
Midterm 3	Topics as listed. In lab			Thurs/Fri Mar 15 <sup>th</sup> /16 <sup>th</sup>
Lab Report 3	Mon of finals week			Mon Mar 19 <sup>th</sup> – 1 pm

Lab	Date	Experiment	Reports, Midterms, Reminders
Lab 1	Tues/Wed Jan 10/11	Registration, attendance, safety video, responsibility agreements, introductory remarks, Safety lecture  Sterile technique. Microbes in the environment Why wash your hands?  Use of pipettors: Demo and exercise	HW 1 due: pre- workshop library survey

		Plant pathogen interaction: Inoculate Kalanchoe plant with Agrobacterium	
Lab 2	Thurs/Fri	Sterile technique.	
	Jan 12/13	Microbes in the environment: Observe results	
		E.coli and toilet paper experiment: Observe results	
		Aseptic technique: streak and spread plates	
		Demo	
		Lab exercise using a mixed bacterial culture	
		Microscopy:	
		Learning to focus the light microscope	
		Demo	
		Lab exercise using prepared (commercial) slides	
		Cleaning your microscope – demo and completion	
Lab 3	Tues/Wed	Microscopy:	HW2 due – table
	Jan 17/18	Calibrating your microscope: Demo and complete	
		Making a wet mount and Phase Contrast Microscopy: Wet	
		mounts and phase contrast:- view, identify, and measure (all with Hay Infusion)	
		Understanding dilutions:	
		Understanding dilutions- theory	
		Measuring microbial growth: Yeast	
		Direct counts using a hemocytometer	
		Using a spectrophotometer	

		Counting viable cells using plating	
Lab 4	Thurs/Fri	Microscopy:	
	Jan 19/20	Continue/complete all wet mounts (all other bacterial and yeast)	
		Microscopy: Staining	
		Smear preparation and simple staining	
		Gram stain: control organisms only	
		Characterizing the Test Organisms:	
		Introduction: Receive 2 test organisms and 2 unknown organisms per group of 4: make a wet	
		mount, streak plate with organisms	
		Winogradsky column	
		Understanding the set up, a first look	
Lab 5	Tues/Wed	Characterization of the Test Organisms	HW3 due – review
	Jan 24/25	Streak stock TSS slant, do wet mounts from both temperatures	paper
		Microscopy: Staining	
		Complete staining of designated Gram positive and Gram	
		negative controls	
		Characterization of the Test Organisms	
		Gram stain	
		MacConkey – inoculate along with known G+ and G- organisms	
		Sticky test along with known G+ and G- organisms	
		Endospore test – inoculate NSM	
		Macronutrient use – how organisms get energy to survive:	
		Introduction: Hydrolysis and use of large extracellular materials	

		Polysaccharides: Starch plates - inoculate	
		Proteins: Skim milk plates and gelatin deeps - inoculate	
		Lipids: Rhodamine plates - inoculate	
Lab 6	Thurs/Fri	Inoculation of control organisms (to create fresh stocks):	York 3010 confirmed
	Jan 26/27	Enterobacter aerogenes	
		Escherichia coli	
		Proteus vulgaris	
		Inoculate 1 TSS or TSA of each per aisle. These slants will be used for the controls for the urease test on Lab 7	
		Data Analysis Workshop:	
Lab 7	Tues/Wed	Characterization of the Test Organisms	MT 1 in lecture
	Jan	NSM – Complete	
	31/Feb 1	Macronutrient use – how organisms get energy to survive	
		Polysaccharides: Starch plates - complete	
		Proteins: Skim milk plates and gelatin deeps - complete	
		Lipids: Rhodamine plates – complete	
		Special metabolic functions: Test organisms only	
		<ul> <li>Indole production from tryptophan, catabolite repression – inoculate</li> </ul>	
		Urease test – inoculate	
		Differential utilization of citrate by enterics - inoculate	
		How energy is produced – aerobic vs. anaerobic breakdown	
		of organic compounds	
		Acid and gas production from sugar fermentation – inoculate	

		Methyl-Red and Voges-Proskauer – inoculate	
Lab 8	Thurs/Fri Feb 2/3	Fundamentals of library research: 90 minute hands on workshop	Workshop in York 3010 confirmed
	. 00 2/0	Characterization of the Test Organisms:	Lab in usual location
		How energy is produced – aerobic vs. anaerobic breakdown	
		of organic compounds	
		Acid and gas from sugar fermentation - complete	
		Methyl-Red and Voges Proskauer – complete	
		T-streak plate for fresh isolated colonies (for Cyto C and	
		catalase)	
		Special metabolic functions: Test organisms only	
		<ul> <li>Indole production from tryptophan, catabolite repression –</li> </ul>	
		• complete	
		Urease test – complete	
		<ul> <li>Differential utilization of citrate by enterics – complete</li> </ul>	
		Inoculation of control organisms (to create fresh stocks):	
		Escherichia coli	
		Pseudomonas fluorescens	
		Enterococcus faecalis	
		Staphylococcus epidermidis	
		Inoculate 1 TSS or TSA of each per aisle. These slants will be used for the controls for the Cyto C and catalase tests on Lab 9	
		Escherichia coli	
		Pseudomonas aeruginosa	

		Inoculate 1 TSS slant of each per aisle. These slants will be used for the controls for the nitrate test on Lab 9	
Lab 9	Tues/Wed	Characterization of the Test Organisms:	HW4 due – online
	Feb 7/8	How energy is produced – aerobic vs. anaerobic breakdown	library tutorial and
		of organic compounds	quiz
		Oxygen requirements – inoculate thioglycolate tube	
		H <sub>2</sub> S production – inoculate	
		Cytochrome C test – complete	
		Catalase test – complete	
		Nitrate reduction – inoculate	
		Winogradsky column: preliminary observations	
		Additional Lecture and Review: Tues sections, room 3406 York; Wed sections, room 1310 York	
		Students come in on non lab day to check thioglycolate tube and Kligler iron deep	
Lab 10	Thurs/Fri	Characterization of the Test Organisms:	
	Feb 9/10	Motility – inoculate plate and deep with test organism	
		How energy is produced – aerobic vs. anaerobic breakdown	
		of organic compounds	
		Oxygen requirements –complete	
		Nitrate reduction – complete	
		H <sub>2</sub> S production – complete test	
		Survival in extreme conditions:	
		• Low pH	

		High pH	
		Low temp	
		High temp	
		High salt 20% NaCl	
		Moderate salt 5% NaCl	
		Control	
		inoculate appropriate broth with test organism	
		Soil Enumeration and Enrichment: First lab period:	
		<ul> <li>Simple Enumeration: Serial dilution, plating on TSA, SDA, GAA, and MacConkey</li> </ul>	
		Extracellular degradation:	
		Enumeration: Serial dilution and plating of soil sample on minimal media + skim milk plates	
		Enrichment of soil organisms: inoculation of minimal media	
		skim milk with soil	
		Extreme Conditions:	
		<b>Enumeration</b> : Serial dilution and plating of soil sample on TSA or TSA + low pH plates as assigned; incubation at assigned temperature.	
		Enrichment of soil organisms: inoculation of TSB or TSB +	
		low pH as assigned; incubation at assigned temperature	
		Non lab day: TAs set up subculture of enrichments: Tues/Thurs TAs - Sat and Mon; Wed/Fri TAs - Sun and Tues	
Lab 11	Tues/Wed	Characterization of the Test Organisms:	Lab Report 1 due

	Feb 14/15	Motility – complete	
		Survival in extreme conditions:	
		Score growth/no growth in each tube	
		Soil Enumeration and Enrichment: Second lab period	
		Simple Enumeration: Colony counts and calculations	
		Extracellular degradation:	
		Enumeration: test differential media, count, and calculate	
		Enrichment: serial dilution and plating; centrifuge cell suspension and freeze pellet	
		Extreme conditions	
		Enumeration: Colony counts and calculations	
		Enrichment: serial dilution and plating; centrifuge cell	
		suspension and freeze pellet	
		Nitrogen fixation: Free-living - Anabaena	
		<ul> <li>Inoculate BG11 and BG11-0 with Anabaena</li> </ul>	
Lab 12	Thurs/Fri	Soil Enumeration and Enrichment: Third lab period	HW5 due- Dilution
	Feb 16/17	Extracellular degradation:	problem
		Enrichment: test differential media, count, and calculate	
		Extreme conditions	
		Enrichment: Colony counts and calculations	
		Metagenomics: First lab period	
		Step 1: Chromosomal DNA preps from frozen cell pellets from various soil enrichments	

		Step 2: Set up 16S rRNA PCR	
		Screening for Antibiotic Producers: grid plates	
Lab 13	Tues/Wed	Metagenomics: Second lab period	Midterm 2 in lab
	Feb 21/22	Step 3: Run gel and evaluate PCR results	Receive HW 6
		Step 4: Purify PCR product	worksheets
		Screening for Antibiotic Producers: Identify antibiotic producers, measure ZOI	
		Evaluation of antibiotics by the Kirby Bauer method	
		Spread plates with standards and test efficiency of antibiotics	
		Non lab period: TAs run gel of purified PCR product and set up ligations (Step 5 of Metagenomics)	
Lab 14	Thurs/Fri	Metagenomics: Third lab period	Computer lab –
	Feb 23/24	Step 6: Transform ligations and plate on selective media	complete elimination tree for Lab Report 2
		Evaluation of Antibiotics by the Kirby Bauer Method	HW6 due - worksheets
		Measure ZOI, identify any resistant colonies	Tiwo due - worksheets
		Characterization of a Test Organism:	
		<ul> <li>Each group or set of groups outlines and explains characteristics of their assigned test organism</li> </ul>	
		Create elimination flow chart for identification of genera	
Lab 15	Tues/Wed	Metagenomics: Fourth lab period	Work on HW 7 in lab, complete after lab
	Feb 28/29	Step 7: Select white colonies and streak out for sequencing	
		Growth curve experiment	
		Growth and graphing of Vibrio natriegens	

Lab 16	Thurs/Fri Mar 1/2	Transposon mutagenesis: Lab Period 1	Room and computer lab?
		Step 1: Set up conjugation of <i>E.coli</i> and <i>Salmonella</i>	
		Yogurt: Inoculate milk with starter yogurt	Lab Report 2 due
		Winogradsky column: Second observation	
		<b>Metagenomics:</b> Analysis of sample sequence data and sample construction of phylogenetic tree– computer lab	
Lab 17	Tues/Wed Mar 6/7	Transposon mutagenesis: Lab Period 2	Computer lab HW7 due – growth curve
		Step 2: Plate exconjugants for selection and counterselection	
		Save LB recipient control plates for later use	
		Yogurt: measure pH, gram stain	
		<b>Metagenomics</b> : Step 8: Begin/complete analysis of all sequences, construction of phylogenetic trees.	
Lab 18	Thurs/Fri Mar 8/9	Transposon mutagenesis: Lab Period 3	Computer lab
		Count colonies and calculate transposition efficiency	
		<ul> <li>Step 3: Screen transposants (mutants) for loss of function mutations</li> </ul>	
		Nitrogen Fixation	
		Free-living: Anabaena: check for heterocysts	
		Symbiotic: Rhizobium: Observe nodules	
		Plant Pathogen	
		Observe Agrobacterium-kalanchoe interaction	
		Metagenomics: Complete analysis/discussion of all sequences	
Lab 19	Tues/Wed	Transposon mutagenesis: Lab Period 4	HW8 due – Post
	Mar 13/14	Check screens	workshop library survey

		Streak out mutants on LB/TSA plate for future use	
		Winogradsky column	
		Observation and sampling	
		Check out	
		Review	
Lab 20	Thurs/Fri	Midterm 3 will be held during normal lecture or lab hours.	Midterm 3
	Mar 15/16		
	Mon Mar 19	Mon March 19 <sup>th</sup> 1 pm (Mon of finals week) – Lab Report 3 due
