

Econ 110B Course Syllabus, Winter 2018

University of California, San Diego

Instructors: Students can ask for help from any of us

Professor James Hamilton	Econ 307	W 11-12	jhamilton@ucsd.edu
TA Jake Orchard	Sequoia 235	Tu 2:30-3:30	orchard.jake@gmail.com
TA Shihan Xie	Sequoia 233	F 11-12	s7xie@ucsd.edu

Discussion sections: Students can go to any discussion section, but to get your exams back must go to section for which you are registered

Tu 6:00-6:50 p.m. Solis 104
Tu 7:00-7:50 p.m. Solis 104
W 6:00-6:50 p.m. Solis 104

Textbook:

Jones, Charles I. (2018) *Macroeconomics*, Fourth edition, W.W. Norton and Company. Students can use either the hardback edition or the custom UCSD edition available at the bookstore. Book is also available on reserve at Geisel library. If needed a student could use the third edition instead of the fourth, though the data would be out of date and some minor new topics would be missing.

Honors section:

Students with an overall GPA of 3.5 or higher in their other economics courses might consider also enrolling concurrently in the honors section Econ 110BH, which supplements the material in 110B going into some of the subjects in more depth.

Grades for Econ 110B will be determined as follows:

We will calculate for each student one point total that puts a weight of 30% on first exam, 30% on second exam, and 40% on final. We will then calculate a second point total that puts a weight of 40% on the best of the first two exams and 60% on the final. Each student's grade will be based on the higher of the two numbers. There will be no make-up exams for any reason-- a missed exam automatically commits a student to the second option.

Exam policies:

No books, notes, calculators, phones, or blank paper are allowed to be on the student's desk or anywhere within sight at any time during any of the three exams.

You must take each midterm exam as well as the final exam in the seat that will be assigned to you.

Problem sets :

It is recommended that students try to complete these on their own before attending the discussion section in which answers to that problem will be reviewed. Note that discussion sections will not meet the first week of class. Answers to [Problem Set 1](#) will be reviewed in the discussion sections meetings Tuesday Jan 16 or Wednesday Jan 17.

Course Outline

Tu Jan 9	Output and potential output (Sections 9.1-9.2)
Th Jan 11	Phillips Curve, short-run model, and shocks of the Great Recession (Sections 9.3-9.5 and 10.1-10.2)
