

# **Econ 110B Course Syllabus, Winter 2019**

## **University of California, San Diego**

**Instructors:** Students can ask for help from any of us

Professor James Hamilton   Econ 307   W 11-12   jhamilton@ucsd.edu

TA Junyuan Chen   Sequoyah 140   Th 4-5   juc212@ucsd.edu

TA Shihan Xie   Sequoyah 233   M 5-6   s7xie@ucsd.edu

**Discussion sections:** Students can go to either discussion section

F 6:00-6:50 p.m. Solis 104

F 7:00-7:50 p.m. Solis 104

### **Textbook:**

Jones, Charles I. (2018) *Macroeconomics*, Fourth edition, W.W. Norton and Company. Students can use either the hardback edition or the custom UCSD edition available at the bookstore. Book is also available on reserve at Geisel library. If needed a student could use the third edition instead of the fourth, though the data would be out of date and some minor new topics would be missing.

### **Honors section:**

Students with an overall GPA of 3.5 or higher in their other economics courses might consider also enrolling concurrently in the honors section Econ 110BH, which supplements the material in 110B going into some of the subjects in more depth.

### **Grades for Econ 110B will be determined as follows:**

We will calculate for each student one point total that puts a weight of 30% on first exam, 30% on second exam, and 40% on final. We will then calculate a second point total that puts a weight of 40% on the best of the first two exams and 60% on the final. Each student's grade will be based on the higher of the two numbers. There will be no make-up exams for any reason-- a missed exam automatically commits a student to the second option.

### **Exam policies:**

No books, notes, calculators, phones, or blank paper are allowed to be on the student's desk or anywhere within sight at any time during any of the three exams.

You must take each midterm exam as well as the final exam in the seat that will be assigned to you.

## Problem sets :

It is recommended that students try to complete these on their own before attending the discussion section in which answers to that problem will be reviewed. Note that discussion sections will not meet the first week of class. Answers to [Problem Set 1](#) will be reviewed in the discussion sections meeting Friday Jan 11.

## Course Outline

Tu Jan 8	Output and potential output (Sections 9.1-9.2)
Th Jan 10	Phillips Curve, short-run model, and shocks of the Great Recession (Sections 9.3-9.5 and 10.1-10.2)
