Overview

As data about individuals, organizations, and governments become increasingly available, social data analytics are transforming the way we think about the economy, politics and society. This course will teach skills necessary to navigate the world of social data. We will learn basic principles of coding through the lens of popular social science data analytics softwares Excel, Stata, and R. While learning coding fundamentals, we will shed light on big social science questions and grapple with larger societal questions that the era of a society governed by data presents us.

Assessment

Your grade will be based on a combination of:

- **Homeworks (40%)**: Four problem sets will be given throughout the quarter. Problem sets will contain analytical, computational, and data analysis questions. Each problem set will be counted equally toward the calculation of the final grade. The following instructions will apply to all problem sets unless otherwise noted.
  - Problem sets will be due on Wednesdays at 9AM.
  - Copies of the homework write-up and accompanying code should be turned in electronically via TritonEd by the due date.
  - Working in groups is encouraged for conceptual and sometimes technical discussion, but each student must submit their own writeup of the solutions that shows their independent work on the assignment. In particular, you should not copy someone else’s answers or computer code. We also ask you to write down the names of the other students with whom you solved the problems together on the first sheet of your solutions.
For analytical questions, you should include your intermediate steps, as well as comments on those steps when appropriate. For data analysis questions, include annotated code as part of your answers. You will lose points on your problem set if your code and write-up is not properly formatted and documented. All results should be presented so that they can be easily understood and code should run easily without errors.

- **Midterm (25%)**: A midterm will be given in class on **Feb. 11** covering the material in the first half of the class.

- **Final (35%)**: The final for this class is **March 20, 2018. 8am to 11am.**

**Academic Honesty and Plagiarism**

All of your graded work must be done by you. If you are unfamiliar with the University’s policy on academic integrity, please see [http://senate.ucsd.edu/Operating-Procedures/Senate-Manual/Appendices/2](http://senate.ucsd.edu/Operating-Procedures/Senate-Manual/Appendices/2).

**Late Assignments Policy**

All problem sets will be considered late immediately after the due date. For each 24-hour period they are late, they will be deducted 10 percentage points. Example: A problem set earning 100/100 points would drop to...

- 90 points if turned in after Wednesday at 9 AM, but before Thursday at 9 AM.
- 80 points if turned in after Thursday at 9 AM, but before Friday at 9 AM.
- 70 points if turned in after Friday at 9 AM, but before Saturday at 9 AM.
- Etc.

**Regrade Policy**

Requests for regrades on problem sets must be submitted to me within 24 hours of receiving the assignment grade. Regraded problem sets will be regraded in their entirety and grades can go up or down.

**Course Website and Piazza Forum**

**Syllabus and course materials.** The syllabus, assignments, solutions, and other course materials will be posted on Piazza. Assignments will be turned in via TritonEd.

**Online Q&A.** Throughout this class we will use the Piazza online discussion board. This is a question-and-answer platform that is easy to use and designed to get you answers to questions quickly. It supports code formatting, embedding of images, and attaching of files. We encourage you to ask questions on the Piazza forum for clarifications, questions about concepts, or about your projects in addition to attending recitation sessions and office hours. You can sign up to the Piazza
course page either directly from the below address (there are also free Piazza apps for the iPhone and iPad):

www.piazza.com/ucsd/winter2019/poli5decon5

Using Piazza will allow you to see and learn from other students’ questions. The instructors will regularly check the board and answer questions posted, although everyone else is also encouraged to contribute to the discussion. You can opt to send a question only to your class, or to send it to the wider group of students in Poli5D/Econ5. Do not email your questions directly to the instructors (unless they are of personal nature) — we will not be answering your questions regarding course materials or problem sets through email.

Course Materials

Since we will be learning Excel, Stata, and R, we will draw on a number of different resources. Many of these resources will be videos from YouTube, blogs, and some will be traditional textbooks. All are freely available online or have been provided by the authors. A few of the primary sources are listed below:

• Principles of Coding: We will rely on videos and exercises from the Hour of Code: [https://code.org/learn](https://code.org/learn)
• Princeton Stata Tutorial: [http://data.princeton.edu/stata](http://data.princeton.edu/stata)
• UCLA Stata Resources: [http://www.ats.ucla.edu/stat/stata/](http://www.ats.ucla.edu/stat/stata/)
• TextBook: *A First Course in Quantitative Social Science*, by Kosuke Imai (Princeton University Press)

Software

This course will consist of three different statistical software programs commonly used by social scientists.

• Excel: All students will need to have purchased access to Excel. Excel is also available in UCSD computer labs.
• Stata: Instructions for getting Stata through the Virtual Computing Lab are available on the TritonEd Website.
• R: an open-source statistical package. You can download it from the web here:

  [http://cran.r-project.org/](http://cran.r-project.org/)

  RStudio is a useful tool for coding in R. You can download it from the web here:

  [https://www.rstudio.com/](https://www.rstudio.com/)
Dates to Remember

- January 23 9AM: Problem Set 1 Due
- February 6 9AM: Problem Set 2 Due
- **February 11**: Midterm
- February 27 9AM: Problem Set 3 Due
- March 13 9AM: Problem Set 4 Due
- March 20, 8AM: Final Exam.

COURSE SCHEDULE

1. **Jan. 7**: Course Introduction and Why Data Analytics?

   Course Materials
   - “Getting Started with Data,” Hilary Mason. [https://www.youtube.com/watch?v=GXjjMSn2Nws](https://www.youtube.com/watch?v=GXjjMSn2Nws)
   - “Big data in the service of humanity: Jake Porway” [https://www.youtube.com/watch?v=fZ3xxXeVrI0](https://www.youtube.com/watch?v=fZ3xxXeVrI0)

2. **Jan. 9**: Data Format and Intro to Excel

   Course Materials

3. **Jan. 14**: Functions in Excel

   Course Materials
4 Jan. 16: Functions in Excel

Course Materials

5 Jan. 23: Introduction to Stata and Reproducibility

Course Materials

• “Introduction to the Stata Interface,” Alan Neustadtl, 15 minutes. [https://www.youtube.com/watch?v=KkCXEK7lwuo&index=1&list=PLRYSxJ3XjgQM342QrBkzek8clHa5ue4Sd](https://www.youtube.com/watch?v=KkCXEK7lwuo&index=1&list=PLRYSxJ3XjgQM342QrBkzek8clHa5ue4Sd)
• “Using the Stata Program Editor,” Alan Neustadtl, first 7 minutes. [https://www.youtube.com/watch?v=XmvWydFD2Y0&index=6&list=PLRYSxJ3XjgQM342QrBkzek8clHa5ue4Sd](https://www.youtube.com/watch?v=XmvWydFD2Y0&index=6&list=PLRYSxJ3XjgQM342QrBkzek8clHa5ue4Sd)

6 Jan. 28: Description in Stata and If Statements

Course Materials

• Bill Gates Explains If Statements, Hour of Code, [https://www.youtube.com/watch?v=m20x2PnJe6E](https://www.youtube.com/watch?v=m20x2PnJe6E)
• Data Management in Stata, [http://data.princeton.edu/stata/dataManagement.html](http://data.princeton.edu/stata/dataManagement.html)

7 Jan. 30: Graphics in Stata

Course Materials

8  Feb. 4: Regression in Stata

Course Materials

- “Simple and Multiple Regression in Stata,” Section 1.0 and 1.3 https://stats.idre.ucla.edu/stata/webbooks/reg/chapter1/regressionwith-statachapter-1-simple-and-multiple-regress

9  Feb. 6: Midterm Review

10  Feb. 11: Midterm

11  Feb. 13: Introduction to R

Course Materials

- Imai, 1.3.1-1.3.3

12  Feb. 20: Analysis of Experiments by Subsetting Data in R

Course Materials

- Imai, 2.1-2.2

13  Feb. 25: Visualizing Data in R

Course Materials

- “Visualizing Ourselves with CrowdSourced Data,” Aaron Koblin https://www.ted.com/talks/aaron_koblin
- Imai, 3.3, 3.6

14  Feb. 27: For Loops and If Statements in R

Course Materials

- Mark Zuckerberg on For Loops, https://www.youtube.com/watch?v=mgooyWMTxk&
- Trina Roy on Counters, Hour of Code, https://www.youtube.com/watch?v=gxc9RCMvky0&
15 March 4: For Loops and If Statements in R

Course Materials

• Imai, 4.1

16 March 6: Regression in R

Course Materials

• Imai, 4.2

17 March 11: Functions in R

Course Materials

• Chris Bosh on Functions, [https://www.youtube.com/watch?v=0eo0ESEX9DE](https://www.youtube.com/watch?v=0eo0ESEX9DE)

• Imai, 1.3.4

18 March 13: Functions in R

Course Materials

• Chris Bosh on Functions, [https://www.youtube.com/watch?v=0eo0ESEX9DE](https://www.youtube.com/watch?v=0eo0ESEX9DE)

• Imai, 1.3.4
