

BIBC 103: Biochemical Techniques

Winter Quarter, 2023

Instructor: Aaron Coleman, Ph.D.
abcoleman@ucsd.edu

Office Hour: Mondays 2 – 3 pm in York 3080D (my office) and York 2300 (conference room on ground floor). We will start in my office and move to the conference room if we need the room.

Lecture: Center Hall 214 Tu/Th 8 – 9:20 am. Lectures will be podcast.

Labs: York Hall 3306 and 3406; Tu/Th 9:30 am – 1:20 pm or 2 – 5:50 pm

Course Objectives:

This course will introduce some of the experimental methods used in biochemistry and molecular biology, with an emphasis on those techniques used to study proteins. You will gain conceptual understanding and hands-on experience in various protein purification techniques and methods for analyzing the different properties of proteins. The laboratory work will consist of two big multi-week projects and some shorter side projects. All the lab work will emphasize mastery of the skills that are essential to work independently in a biochemistry lab, including hands-on wet-lab and quantitative reasoning skills.

More importantly, this course is designed to give an appreciation of what science is and how it works. Science is not just a bunch of random facts...it is a process! It is easier to understand biology, or any field, when you understand how we know what we know about it. Understanding how information in biology is brought to light is just as important as the information itself. Through the laboratory projects we will develop the skills necessary to interpret data from experiments in order to answer questions about biological systems, and to design experiments to ask new questions. In keeping with this, the importance of good experimental design, including the use of appropriate controls, will be highlighted in all experiments.

Materials Required:

- 1) Biochemical Techniques Lab Manual, 2022 – 2023 Edition (available from the Bookstore)
- 2) Bound laboratory notebook (see Canvas for information on the type of notebook required)
- 3) Safety glasses
- 4) Lab coat

Course Structure

Activity	Point Value
LDH Purification: Lab notebook	35
LDH Purification: Purification table analysis	100
Drosophila Alcohol Metabolism: Lab notebook and statistical analysis	55
Sea Urchin Fertilization Signaling: Lab notebook	30
Sea Urchin Fertilization Signaling: Lab report	220
Bioinformatics: Lab manual questions	50
Bioinformatics: PyMOL protein structure	50
Lysozyme crystallization: Lab notebook	20
Lysozyme crystallization: Improve crystals	20
Quizzes: Four at 30 points each	120
Exam 1	100
Exam 2	200
Total	1000

Point Cutoffs for Grade Assignments: (Cutoffs may be lowered at the instructor's discretion.)

910-1000	A	790-799	C+
900-909	A-	705-789	C
890-899	B+	695-704	C-
810-889	B	600-694	D
800-809	B-	0-599	F

Course Web Site:

Except for the lab manual, all course materials will be accessed through the course webpage on [Canvas](#). Much of the data you generate in your experiments will be accessed through Canvas, in addition to lab report guidelines and practice problem sets for quizzes and exams. Be sure to check Canvas frequently for announcements and updates on assignments.

Lab Quizzes and Exams:

All quizzes and exams will be taken in person during the lab sessions. The purpose of the lab quizzes is to be sure you are mastering the basic concepts behind your experiments as we go through the class. This includes understanding the purpose of the lab projects and how each experiment fits into this, the basic concepts underlying the procedures, and simple mathematical and analytical skills based on what you have actually done in lab. The quiz dates are given in the lab schedule. Quizzes will be given at the beginning of lab, will take 15 – 30 minutes, and will consist of 5 or 6 questions. The topics that will be covered on each quiz will be posted in an announcement on Canvas on the Monday prior to the quiz.

The two exams are cumulative and are focused on having you use what you are learning in the class at a level that requires application and analysis. They may include some basic

questions on the concepts we have covered, but will emphasize using the knowledge and skills you have developed for more in-depth problem solving. Practice questions will be provided on Canvas to help you prepare for the exams.

Lab Attendance Policies:

In-person attendance at each lab session is mandatory. If you test positive for COVID-19 or feel ill, however, stay home and contact the instructor by email. If you test-positive for COVID-19 and must isolate, we will work with you to keep you in the class. If you know that you need to miss a lab session, discuss this with the instructor (not the IA, they are not authorized to give you permission) to see if it will be possible to make up the lab session or excuse you from the lab with no consequences. Please bring this to the instructor's attention as soon as you know that it will be an issue. An unexcused absence will result in 10 points being deducted. **Only the instructor can excuse an absence. Two unexcused absences will result in the student failing the course.**

Turning in the Lab Report:

Lab reports will be submitted electronically on Canvas. Lab reports are due before the end of the day (11:59 pm) on the due date. Ten points will be deducted for each day following the due date that the lab report is late. Students agree that by taking this course all required papers will be subject to review for textual similarity by Turnitin.com for the detection of plagiarism. All submitted papers will be included as source documents in the Turnitin reference database solely for the purpose of detecting plagiarism of such papers. Use of the Turnitin service is subject to the terms of use agreement posted on the Turnitin site.

Lab Report Grading and Regrade Policy: Your lab report will be graded by your IA, based on the lab report guidelines. I work closely with all the IAs to ensure that the grading is accurate and equivalent between sections. If you disagree with the grading of your lab report, discuss this with your IA to get clarification on why points were deducted. If you still disagree with the grading, you may submit the report to me for a re-grade. This must be done within one week of receiving the graded report. I will re-grade the entire report and give you a new score, and this is the score that will be recorded.

Lab Schedule

	Dates	Experiment/Activity	Lab Manual Chapter
Wk 1	Jan. 10	Enrollment and safety orientation; Lab skills and equipment exercises	Lab 1 (and pp. 1-11)
	Jan. 12	Introduction to SDS-PAGE Quiz 1	Lab 2
Wk 2	Jan. 17	LDH 1: Initial purification of lactate dehydrogenase from crude homogenate: centrifugation, ammonium sulfate precipitations; prepare size exclusion column	Lab 3
	Jan. 19	LDH 2: Affinity chromatography	Lab 4
Wk 3	Jan. 24	LDH 3: Size exclusion chromatography	Lab 5
	Jan. 26	LDH 4: Activity assays; Bradford protein assays	Lab 6
Wk 4	Jan. 31	LDH 5: SDS-PAGE of LDH purification fractions	Lab 7
	Feb. 2	LDH 6: Native gel electrophoresis of LDH with activity stain Quiz 2	Lab 8
Wk 5	Feb. 6	LDH purification table analysis due Monday at 11:59 PM	
	Feb. 7	Fly Lab 1: Sort flies and prepare assays	Canvas pdf
	Feb. 9	Exam 1 in Lab	
Wk 6	Feb. 14	Fly Lab 2: Ethanol Mobility Behavior Assay; alcohol dehydrogenase activity assays; determination of substrate specificity	Canvas pdf
	Feb. 16	Fly Lab 3: Statistical analysis of data; Lysozyme crystallization: prep crystals round 1 Quiz 3	Lab 18 parts A - C
Wk 7	Feb. 21	Sea urchin fertilization, prepare cell lysates	Lab 9A
	Feb. 23	MAPK Western blot—SDS PAGE and electroblotting	Lab 10
Wk 8	Feb. 28	MAPK Western blot—Immunodetection	Lab 11
	Mar. 2	ELISA for phospholipase C activity; Lysozyme crystallization: examine crystals round 1; prep crystals round 2	Lab 12
Wk 9	Mar. 7	Bioinformatics 1: Investigation of an unknown melanoma gene Quiz 4	Lab 19 part A
	Mar. 9	Bioinformatics 2: Modeling protein structures	Lab 19 parts B - D
	Mar. 10	Fertilization signaling lab report due Friday at 11:59 pm	
Wk 10	Mar. 14	Lysozyme crystallization: examine crystals round 2	Lab 18 part D
	Mar. 16	Exam 2 in Lab
